

SUPER V3 POWER PRO VENTILATION SAW

SUPER V3 POWER PRO VENTILATION SAW

With a powerful Dolmar 6.3 HP engine that turns at 13,500 RPM, your department can rely on the Super Vac SV3 Power Pro Saw for venting and rescue operations. With a full-wrap handle designed for maximum versatility, this saw tackles a variety of operations with ease, including cutting through residential roofing, removing downed trees, and ripping through various wood building materials. With a quick start compression release and an "always on" ignition, the SV3 is ready to go when you are.

SV3 POWER PRO VENTILATION SAW KIT

MODEL -SV3-16-Kit-AL or SV3-20-Kit-AL

- 1- Saw with d- ring handle installed, and
- 1- Pair safety glasses.
- 1- Pair ear plugs.
- 1- Pair gloves
- 1- Container 2 cycle oil
- 1- 1 gallon metal safety gas can
- 1 Dolmar service set consisting of...
 - 1- Fuel cap
 - 1- Starter cord
 - 1- Combination wrench
 - 1- Spark Plug
 - 1- Dolmar filter set consisting of.
 - 1- Air filter cartridge
 - 5- Pre filters
 - 1- Dolmar guide roller
 - 1- Set manuals
 - 1- Carbide Chisel
 - Chain 16" or 20"

MODELS- SV3-16 and SV3-20

ENGINE - Dolmar PS-7900

DISPLACEMENT- 79 cc

OUTPUT/SPEED- 6.3HP/13,500 RPM

KILL SWITCH - Momentary, the ignition is always in the on position.

FUEL TANK CAPACITY- 30 oz

OIL TANK CAPACITY- 13.5 oz

WEIGHT- 20.8 lbs

AIR FILTER - Airmaster Multi Chamber filtration system

CHAIN - Carbide chisel, .404, dual raker, .063 gauge

DEPTH GAUGE- Full Safety cover with quick adjustment and/or removal

WHY THE SV3 MAKES THE CUT

THE ENGINE

With an unbelievable power to weight ratio, the SV3's 6.3 HP engine rips through material at 13,500 RPM, making this one of the fastest and most powerful rescue saws available. This is the saw you need to get the job done fast, when seconds count.

THE CHISEL CHAIN

This .404 carbide tooth chain chisels through layers of material, taking bigger bites and moving faster through wood and layers of asphalt – just what every rescuer needs for quick rooftop operations.

LATERAL CHAIN TENSIONING

Developed by Dolmar for fast and easy on-the-spot tension adjustment.

FAST AND EASY STARTING FEATURES

Quick placement of just one knob simultaneously sets both the throttle and choke to their optimum starting positions. An easy to spot color-coded button activates a compression release, reducing pull rope resistance by up to 50% - a must have on this high-output engine. Both of these features save critical seconds during rescue operations.

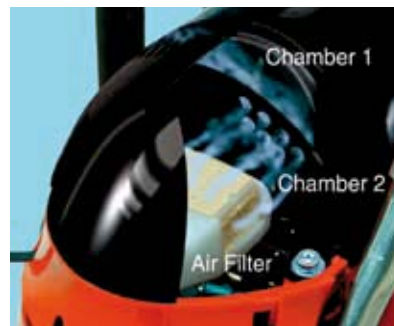

THE NAME

Every Firefighter knows the name Super Vac. For over 50 years, Super Vac has been synonymous with expertise, innovation, and service in the fire industry. So you can bet that all of this experience went into the design of the new SV3 Ventilation Saw.

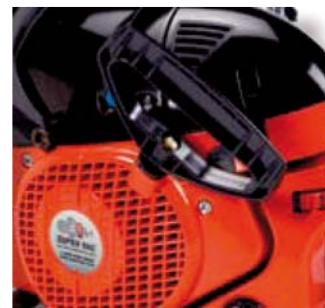

THE AIRMASTER MULTI CHAMBERED FILTRATION SYSTEM

This two chambered system designed by Dolmar stops larger particles before they reach to the secondary filter. The secondary filter stops the finest particles, without the risk of clogging by the larger splinters and debris. This makes SV3 the machine of choice for rescuers working in particle laden environments.

D-RING PULL HANDLE

The SV3's easy-to-grasp D-Ring handle is a perfect match for hands protected by multi-layered rescue gloves. No more time wasted while fumbling with hard to grasp handles. Once again, Super Vac has shown that they understand that every second counts during lifesaving operations.

FULL WRAP HANDLE

The full wrap around handle makes front facing and overhead operations easier, meaning faster placement of the saw and longer cuts without repositioning. Another Super Vac feature designed for the fire service.
