

CONTAMINANT CONTROL

YOU'RE NOW ENTERING THE

RED ZONE.™

Contaminant Control Package

When the tones drop and you arrive on the scene of a fire, your turnout gear and hood are immediately exposed to a number of toxic chemicals – exposure that can result in serious health problems. That includes cancer, which is currently the leading cause of U.S. firefighter deaths. With that fact in mind, LION has developed **RedZone™**, our exclusive contaminant control package.

RedZone features five particulate-blocking zones designed to help reduce your exposure to the dangers lurking in fireground smoke:

ZONE 1:

PARTICULATE-BLOCKING HOOD

A breathable, ultra-soft hood with **StedAir® PREVENT** protects the head and neck from particulates, while also providing excellent mobility and unrestricted hearing during firefighting activities.

ZONE 2:

ARM GUARD

Elasticized wrist shields and enhanced **IsoDri®** knit wristlets with **Nomex® Nano Flex** help block particulates at the coat-to-glove interface.

ZONE 3:

CORE GUARD

A **Nomex® Nano** multi-layered composite with an elasticized band helps reduce particulate ingress at the coat-to-pant interface.

ZONE 4:

CLOSURE GUARD

Engages with just one zip. No extra steps to don the gear. Red hook and loop indicates when turnout coat is properly closed.

ZONE 5:

LEG GUARD

Together, the elasticized ankle shield and **Nomex® Nano Flex** calf protector help block particulate exposure at the pant-to-boot interface.
