RETURNS - Many items in this catalog are custom orders and not subject to cancellation or return. Orders that may be returned are subject to a 25% restocking charge.

FREIGHT - Except where stated otherwise, all orders will have freight charges added to the item purchased.

TERMS & CONDITIONS

PAYMENT - Net 30 Days for all Fire Depts. and State or Municipal Agencies. We also accept AX, Discover, MasterCard and Visa.

FREIGHT - Except where stated otherwise, all orders will have freight charges added to the item purchased.

RETURNS - Many items in this catalog are custom orders and not subject to cancellation or return. Orders that may be returned are subject to a 25% restocking charge. Absolutely no merchandise may be returned that is not new and unused.

*Please do not return any merchandise without prior approval and before receiving a return authorization number.

WARRANTY AND REPAIRS - All merchandise in this catalog is subject to each manufacturer’s warranty. Due to OSHA regulations, any garment returned for warranty must first be laundered.

ACKNOWLEDGMENTS - We mail to the billing address a copy of all sales orders. Please review this copy and advise our office of any discrepancies.

PRICING VALIDITY - We will hold all pricing in this catalog until we are advised of price increases by our manufacturers. In the event of a price increase, we will notify you before processing your order. Our toll free number is for your convenience, we suggest you occasionally call us to verify prices before placing orders.

Note: Current pricing is typically available on the website.

MINIMUM CHARGE - $50.00 - We reserve the right to waive the minimum charge. We endeavor to eliminate any typographical errors or omissions but cannot be held responsible if they occur in this catalog.
“I have no ambition in this world but one, and that is to be a firefighter. The position may, in the eyes of some, appear to be a lowly one; but we who know the work which the firefighter has to do believe that his is a noble calling. There is an adage which says that, “Nothing can be destroyed except by fire.” We strive to preserve from destruction the wealth of the world which is the product of the industry of men, necessary for the comfort of both the rich and the poor. We are defenders from fires of the art which has beautified the world, the product of the genius of men and the means of refinement of mankind. But, above all; our proudest endeavor is to save lives of men - the work of God Himself. Under the impulse of such thoughts, the nobility of the occupation thrills us and stimulates us to deeds of daring, even at the supreme sacrifice. Such considerations may not strike the average mind, but they are sufficient to fill to the limit our ambition in life and to make us serve the general purpose of human society.”

-- Chief Edward F. Croker, FDNY, circa 1910

“Firemen are going to get killed. When they join the department they face that fact. When a man becomes a fireman his greatest act of bravery has been accomplished. What he does after that is all in the line of work. They were not thinking of getting killed when they went where death lurked. They went there to put the fire out, and got killed. Firefighters do not regard themselves as heroes because they do what the business requires.”

-- Chief Edward F. Croker, FDNY, speaking upon the death of a deputy chief and four firefighters in February of 1908

CELEBRATING OVER 100 YEARS OF FAITHFUL SERVICE
1911-2020

We wish to thank our loyal customers who have allowed us to serve them for the past 100+ years. It is our company goal to be your number one supplier for the next 100 years... and longer.

Your past and continued business is greatly appreciated.

Don’t forget to check out our amazing new website - You won’t be disappointed!

Key steps you should take BEFORE leaving the fire ground!

Decrease contaminants by **85%**

**WHEN YOU PERFORM**

**A WET-SOAP DECON**

SAFELY REMOVE YOUR GEAR

Ask a fellow firefighter who is wearing latex gloves to take off your PPE gloves. Then, put on **clean latex gloves** before handling your gear.  

Pull your hood over your head while your SCBA is still on instead of pulling it down to rest on your neck.

Shower within an hour! Wipes are effective, but they don’t replace a shower. Start your shower with cold water, then switch to **very hot** water.

**STOP CANCER AT THE DOOR**

**WE’VE GOTTEN YOU COVERED!**

**WIPE THE SOOT** FROM YOUR BODY.

In this order:

1. **EYES**
2. **FACE**
3. **NOSE** (inside first, then blow your nose)
4. **EARS** (inside first, then behind)
5. **NECK** (includes neck and beneath collar)
6. **ARMS**
7. **HANDS** (between fingers and under nails)
8. **HAIR/TOP OF HEAD**
9. **UNDERARMS**
10. **TORSO/BACK**

**NOTE:** Your hood should only rest on your neck if it’s CLEAN.

**SOURCES:**

1. Contamination of firefighter personal protective equipment and skin and the effectiveness of decontamination procedures, Journal of Occupational and Environmental Hygiene, 2017

ABOUT NOT IN OUR HOUSE: The NOT IN OUR HOUSE cancer awareness initiative is LION’s commitment to keeping firefighters and their families safe from fire service-related cancer. Learn more at notinourhouse.com.
I accept the Not in Our House Cancer Awareness pledge. I will make every effort to protect myself and my team by doing my part to take precautions that will minimize the risk of exposure to carcinogens that may lead to cancer. This pledge is to honor all those who have come before, as well as those who will come after me.

Thank you for your support!
When the tones drop and you arrive on the scene of a fire, your turnout gear and hood are immediately exposed to a number of toxic chemicals – exposure that can result in serious health problems. That includes cancer, which is currently the leading cause of U.S. firefighter deaths. With that fact in mind, LION has developed RedZone™, our exclusive contaminant control package.

RedZone features five particulate-blocking zones designed to help reduce your exposure to the dangers lurking in fireground smoke:

**ZONE 1:**
**PARTICULATE-BLOCKING HOOD**
A breathable, ultra-soft hood with StedAir® PREVENT protects the head and neck from particulates, while also providing excellent mobility and unrestricted hearing during firefighting activities.

**ZONE 2:**
**ARM GUARD**
Elasticized wrist shields and enhanced IsoDri® knit wristlets with Nomex® Nano Flex help block particulates at the coat-to-glove interface.

**ZONE 3:**
**CORE GUARD**
A Nomex® Nano multi-layered composite with an elasticized band helps reduce particulate ingress at the coat-to-pant interface.

**ZONE 4:**
**CLOSURE GUARD**
Engages with just one zip. No extra steps to don the gear. Red hook and loop indicates when turnout coat is properly closed.

**ZONE 5:**
**LEG GUARD**
Together, the elasticized ankle shield and Nomex® Nano Flex calf protector help block particulate exposure at the pant-to-boot interface.

LION TOTALCARE®

KEEPING YOU SAFER, LONGER

Soiled gear can pose a health risk to firefighters. Smoke deposits and condensed residue can become trapped in fibers and remain there until cleaned, leaving you at risk to secondary exposure to cancer-causing chemicals and gear that may not provide you with protection when you need it most. Detecting damage on your gear early via regular inspections can help prevent ongoing degradation, as well as identify signs of failure before they become a safety issue or lead to irreversible damage.

Help enhance firefighter safety and save your organization money by extending the life of your PPE through regular cleaning, inspection and repair with LION TotalCare.

When you use LION TotalCare, you are choosing to partner with a company that has over 20 years of experience in helping to keep you safe. As a Verified Independent Service Provider for all components of turnout gear, all of our repairs are NFPA-certified.

PPE CLEANING

We offer Advanced Cleaning, Decontamination and Biohazard Disinfection, all of which are performed by trained and experienced professionals. Turnout gear takes serious abuse – and that requires extra work on your part. Even the best-quality turnout can see a lifetime of as little as three years when it is not cleaned and well-maintained – but it doesn’t have to be that way. Consistent cleaning and maintenance of your gear can help it reach the 10-year maximum lifespan under NFPA 1851, saving you money on replacements and giving you peace of mind knowing that your gear is ready for that next call.

PPE INSPECTION

TotalCare goes beyond the obvious with advanced inspection services that go from your shell to your moisture barrier or liner system. For gear older than three years, we do an annual liner inspection, complete with hydrostatic testing and evaluation of hidden seams. Charring or tearing on an outer shell may be easy to spot, but not on your liner system or leaks in your moisture barrier. TotalCare’s advanced inspection goes deeper to uncover all possible issues and help keep you safe.

PPE REPAIR

MORE COST EFFECTIVE THAN REPLACEMENT

Worn or damaged gear is often repairable and a more cost-effective solution than replacement. LION TotalCare® will repair gear without compromising its original construction to maximize the gear’s performance. We can also repair gear as part of its maintenance, fixing small issues before they become big problems.
CLEANER GEAR IS SAFER GEAR.

An example of a turnout coat inspected, cleaned and repaired by LION TotalCare®.

Typical TotalCare cleaning and repair services include Inspection, Disinfection, Washing, Trim Replacement and Hole/Rip Repair.

For Orders and Questions: Phone 800-759-FIRE or Fax 914-592-3892
What's inside your turnout gear?

Firefighters know they face danger every time they step foot off the engine at a fire site. You have to be at the top of your game, and make quick decisions to save lives and keep yourself and your fellow firefighters safe. The last things you need to worry about are staying dry and comfortable. LION’s innovative isodri® technology was developed to help keep you more dry and comfortable so that you can focus on the job at hand.

Less water on the inside means your gear will be lighter.

You are already shouldering a lot of weight with your SCBA and carrying a fully charged hose through a fire site. You do not need your gear to take on additional heft to bog you down while working. Only isodri can keep your gear as light as possible, helping you focus on the task at hand.

A traditional liner system and LION’s isodri liner system were tested. Both weighed the same amount dry. Once both liner systems were immersed in water for the same period of time, they were weighed again. The traditional gear weighed five times as much as LION’s turnout gear featuring the isodri system. That’s a lot of extra weight to carry around, further contributing to heat stress.

Gear dries faster between runs as it will absorb less water.

How many times have you received another call just hours after you returned to the firehouse from a previous run? No one likes to put on wet and clammy gear and head out on a run.

Firefighters have reported that gear with the isodri system dries and is comfortable to wear in less than 30 minutes after doffing. That quick turnout means you’re comfortable and ready to go no matter how quickly that next fire alarm goes off.
Why Isodri?

The more air insulation in your liner system, the less likely it is you’ll get injured.

Did you know that water transfers heat to your skin 21 times faster than air? That’s why drier gear is safer for you. Only Isodri manages moisture in the thermal barrier of your turnout gear.

The thermal liner works like insulation in a house, trapping air inside millions of tiny pockets. The trapped air creates a barrier to heat flow. If the air pockets are compressed or filled with moisture, the thermal liner’s ability to block heat is compromised. More air inside your gear keeps you drier, and safer.

How Isodri® Works

Isodri® is more than just an outer shell that resists water penetration and absorption. It is a complete system of components (outer shell, moisture barrier, thermal barrier and wristlets) that works together to reduce the water in your turnout gear and the dangers that water presents.

- Outer shell is treated with Teflon® F-PPE to reduce moisture intake from outside sources such as hose water and rain.
- W.L. Gore CROSSTECH® Black, CROSSTECH® 3-Layer or RT7100™ moisture barrier allows body heat, in the form of vapor, to escape but keeps liquid out.
- Thermal barrier is treated with Teflon® F to shed moisture generated by the body and maintain high thermal performance. AraFlo® promotes air permeability to allow vapor released by the body to be more easily transported away from the skin.
- Facemask wicks perspiration away from the body.
LION'S GAME-CHANGING
TURNOUT SOLUTION

Innovative gear that combines combat and sports technology!

LION’s NFPA 1971-certified V-FORCE gear features an innovative cut-in-motion design that moves the way you do. Its distinctive combination of sports and combat gear detailing increases comfort and mobility – reducing stress and fatigue, without sacrificing protection on the fire ground.

KEY GEAR FEATURES

V-Fit™ Design
V-FORCE gear includes cutouts, shaped pieces and darts to allow natural arm and leg movement without restrictions or tugging. Contoured coat side panels have a more tailored fit to move with your body during firefighting activities.

Raglan Sleeves
Shaped like your arm, these sleeves promote free, unrestricted movement and reduce turnout coat hem rise.

Superior Cut
This cut-in-motion design evenly distributes the weight of your turnout and positions seams to reduce conflicts with SCBA straps that can cause irritation and discomfort.

Radial Inseam
This feature reduces crotch tension during routine firefighting activities for increased leg mobility and a more comfortable fit.

LION Ventilated Trim™
This patented turnout reflective trim provides a vapor release that helps guard against the potential hazards of trapped moisture. It’s also more flexible than traditional reflective trim.

V-Notch™ Reinforcements
These distinctive poly-coated aramid (PCCA) elbow and knees are padded and shaped for optimal mobility and protection.
LION V-FORCE® GEAR

EXCELSIOR SPEC

V-FORCE BI-SWING COAT

COAT LINER:
- (K7) Traditional Liner
- 2.3 oz GLIDE™ quilted face cloth with Nomex®/Kevlar®
- CROSSTECH® BLACK moisture barrier
- IsoDri® Moisture Management System

WRISTLETS:
- 8” over-the-hand style
- Kevlar/Nomex/Spandex® construction

OUTER SHELL:
- 6.5 oz Armor AP
- Black, Khaki, or Gold

REFLECTIVE TRIM:
- 3” NYC yellow 3M™ Scotchlite™ LION Ventilated Triple Trim™

DRD REFLECTIVE TRIM:
- 3” red Ventilated Triple Trim set vertical down flap of firefighter recovery harness

COLLAR:
- Standard 3” split self fabric
- CROSSTECH® PJ-lined

COAT CUFFS:
- Self fabric cuff reinforcements

ELBOWS:
- Contoured self fabric elbow patches, no padding

SHOULDER CAPS:
- Self fabric shoulder caps

STORM FLAP:
- Standard 2.5” storm flap (zipper in, hook on coat front, loop on storm flap)

RADIO POCKET:
- 3.5” x 9” x 2” with poly-cotton fully-lined all three sides inside pocket
- Left chest location

COAT POCKETS:
- 10” x 6” x 2” full bellow pocket with Kevlar twill fully-lined all four sides
- Left and right, front bottom location

FLASHLIGHT STRAP:
- 1.25” x 8.5” self fabric flashlight strap with a one-piece 1” x 2” loop on one end & one-piece 1” x 2” hook on other end, 1” x 2” self fabric with 703 fastener bartacked 5” above strap
- Right chest location

DEPARTMENT NAME:
- Sewn-on 3” Lime/Yellow 3M Scotchlite letters with department name across yoke

#LP34 TAIL PATCH:
- 5” x 18” contoured two-layer self fabric
- One line letter patch to be attached to hem of coat with firefighter’s last name

DEE RING:
- One dee ring attached to coat (location to be determined)

MIC TAB:
- 1” x 3” triple layer self fabric mic tab (bartacked on each end), located above radio pocket

PANTS:

PANT LINER:
- (K7) Traditional Liner
- 2.3 oz GLIDE quilted face cloth with Nomex®/Kevlar®
- CROSSTECH® BLACK moisture barrier
- IsoDri® Moisture Management System

OUTER SHELL:
- 6.5 oz Armor AP in Black, Khaki, or Gold

PANT FLY:
- Standard fly with PJ Ctech and thermoplastic zipper closure

TAKE-UP STRAPS:
- One pair 1” x 10” self fabric postman take-up straps, two bartacks and 5/8” postman slides

KNEES:
- Black poly-coated aramid (PCA) contoured knees with two layers Lite-N-Dri cushioning

CUFFS:
- Black poly-coated aramid (PCA) pant cuffs and 3” x 3.5” kick shield

POCKETS:
- 10” x 10” x 2” full bellow pocket with Kevlar twill fully-lined on three sides inside pocket.
- Left and right thigh location

PANT LEG STYLE:
- Boot cut

REFLECTIVE TRIM:
- 3” Yellow 3M Scotchlite Ventilated Triple Trim
- Bottom leg location

SUSPENDERS:
- 42” regular, V-BACK Quick-Adjust Padded Suspenders (2” metal loops only)
- Red with four 2” wide self fabric suspender tabs

CUSTOM COAT & PANT UPGRADES

COAT TAIL PATCH
- Replace LP34 tail patch with 7” x 22” tail patch with 2” trim across bottom of patch

HIGH BACK PANTS
- V-FORCE High Back Pants

HARNESS PANT LOOPS
- Nine self fabric belt loops, each made using two separate 1” x 3” straps that close with 1” x 2” hook with female logo snap and loop with male snap
- Seven loops bartacked even at waist and two at crotch

#BHS048 HARNESS
- Removable Integrated Harness

#FBP1030 BAIL OUT POCKET
- 10.5” x 10” x 9” x 2.25” full bellow bail out pocket with Kevlar 5” up inside pocket
- Replaces one pocket on pants

LION SUPER-DELUXE® TURNOUT GEAR

EMPIRE SPEC

KEY GEAR FEATURES

Freedom® Design
These patented arm and leg design innovations allow for natural flexible motions. This includes more comfortable crawling, climbing, kneeling and arm movement.

Radial Inseam
This turnout pant feature reduces crotch tension during firefighting activities, resulting in increased leg mobility and a more comfortable fit.

Ventilated Trim™
This patented coat and pant reflective trim provides a vapor release that helps guard against the potential hazards of trapped moisture. It’s also more flexible than traditional reflective trim.

Bi-Swing Coat Design
Elbows and knees include cutouts, shaped pieces and darts to allow natural arm and leg movement for a fit that moves with your body during firefighting activities.

Underarm Bellows Sleeves
Bellows located under each coat arm compress and expand during firefighting activities to reduce hem rise and sleeve travel, for added protection.

Comfort Collar
Ergonomically designed, this collar interfaces with other PPE elements to deliver continuous thermal and moisture protection.

LION’S MOBILITY-OPTIMIZED TURNOUT SOLUTION

Gear designed for outstanding safety, comfort and freedom of movement!

Super-Deluxe turnouts are NFPA 1971-certified and feature LION patented Freedom Design, which reduces firefighter body stress through a series of innovative, ergonomic features. These unique elements work together to help deliver exceptional safety, mobility and comfort.

Gold Armor AP™ Coat and Pants

Built with isodri® Protective Systems

• 6.5 oz/yd2 Armor AP™ outer shell of 65% DuPont™ Kevlar® and 35% DuPont™ Nomex® twill weave with extremely durable FPPE water resistant Teflon® FPPE alloy
• Glide Ice™ face cloth quilted to 2.3 oz/yd2 Nomex®/Kevlar® Spunlace Dri and 1.5 oz/yd2 AraFlo® Dri for lightweight thermal protection with optimal moisture management
• CROSSTECH® black moisture barrier promotes evaporative cooling of body heat and resists water, blood-borne pathogens and common chemicals
• New York City style 3M™ Ventilated Scotchlite™ Reflective Material triple trim (lime-yellow and silver)

Armor AP™ Coat (32” length) $1104.00

CCHX-42 (Gold Color)
• 3” contoured comfort collar for comfortable interface with SCBA mask
• LION’s exclusive SemperDri™ system in water wells and yoke reduces water absorption to keep your working weight low
• Bi-swing back for exceptional forward mobility
• Freedom® elbow design for natural flexing motion and optimum mobility
• Gold polymer-coated aramid cuff reinforcements and bellow elbow with Lite-N-Dri™ cushioning
• 4” x 6” polymer-coated aramid shoulder caps
• 8” over-the-hand Nomex®/Kevlar® IsoDri® wristlets
• 3.5” x 9” x 2” radio pocket on left chest
• Thermoplastic zipper coat closure with hook and loop storm flap closure
• Roomy 8.5” x 9” liner pocket
• Drag Rescue Device (DRD) with soft weave Kevlar® webbing for comfort
• Liner inspection system

Armor AP™ Pants $718.80

PCHX-42 (Gold Color)
• Low-rise waist complements the natural contours of the body
• Freedom® knee with Lite-N-Dri™ cushioning at the knee between the thermal liner and moisture barrier for natural flexing motion and optimum mobility
• Gold polymer-coated aramid knee with Lite-N-Dri™ cushioning
• Gold polymer-coated aramid cuff and kick shield reinforcements
• Radial inseam band enables free and natural movement
• LION's exclusive SemperDri™ system in lower legs reduces water absorption to keep your working weight low
• Thermoplastic zipper pants closure with hook and loop storm fly closure
• External self-fabric take up straps for custom fit
• 8” x 8” x 2” full bellows pocket on each thigh lined with Kevlar® twill
• EZ H-Back quick-adjust, non-stretch suspender
• Liner inspection system

Coat Options:
- FLS521 1” x 10” Flashlight Strap $7.20
- MF003 Reverse Snap Hook $4.80
- MF011 Dee Ring $4.80
- MT503 1” x 3” Mic Tab $4.80

LP1S 4” x 18” One Line Letter Sewn on Letter Patch $8.40
LP1V 4” x 18” One Line Letter Patch w/ Velcro $24.60
LP34 5” x 18” One Line Hanging Letter Patch on Hem $25.80

Letters
- One Name Line of 3” Sewn on Letters (up to 12 Letters) $28.20**
- One ID Line of 3” Sewn Letters (ID Lettering, less than 6) $8.40**

**Must order a patch for all lettering**

Personal Rescue System from LION

*Easy To Use. Always with you. Never in the way.*

The Personal Rescue System from LION integrates all escape components (50-foot escape line, descender, your choice of anchor, a quick link and a tether) and stows them in a cargo pocket on the leg of turnout pants. It can be deployed using any Class II life safety harness or escape belt.

There are two pocket options: horizontal or vertical split cargo pocket. Each keeps the rope from becoming entangled with the other hardware.

The Personal Rescue System is available on most LION turnouts. It can also be retrofitted to any manufacturer’s turnout pants and works with the LION Integrated Class II Harness, the LION Escape Belt (see below) or with any manufacturer’s Class II harness or escape belt.

LION INTEGRATED CLASS II HARNESS™ & ESCAPE BELT

**LION Integrated Rescue Harness™ - Ready When You Need It**

LION's Integrated Class II Harness™ features a new single-point of attachment design for improved functionality and ergonomically positioned leg loops for increased comfort. The harness is built into your turnout pants so it’s always available when you need it. The harness is located between the outer shell and liner system. This maintains the integrity of your PPE and protects the harness. The harness is removable for easier care and maintenance.

Made from Kevlar® with a unique design that makes it intuitive — its size respondst to the user. It tightens when loaded, yet is relaxed and doesn’t interfere with other work situations. The LION Integrated Class II Rescue Harness™ is designated as a NFPA 1983, Class II Life Safety Harness. It is to be used for emergency escape with up to two-person load/capacity. It also meets all the requirements of NFPA 1971, so the harness retains its integrity when exposed to heat. A LION Integrated Class II A-Frame Rescue Harness (with certified ladder teather) is also available.

**LION Escape Belt**

The LION Escape Belt is an emergency self-rescue device that fastens at the waist outside of your turnout pants. The belt is positioned through belt loops on the pants and fastens with a hook and ring closure. When the escape rope is attached to the belt, it engages in the proper position.

The escape belt is made from two-inch Kevlar® webbing and is certified to meet NFPA 1983. It is certified for use up to 300 pounds. When the belt is combined with a rope, descender and carabiner, it can be used as an escape system.

*Call us today, for details and pricing!*

Rock-N-Rescue Escape Systems

RNR, W/F4 & LIGHTNING GT HOOK – Personal Escape Rope
RES005  $266.95

RNR, W/F4 & LIGHTNING GT HOOK – Safe Tech Rope
RES011  $290.95

RNR, W/F4 & LIGHTNING GT HOOK – Fire Tech 2 Rope
RES017  $327.95

The latest in personal escape systems. This kit includes the innovative F4 personal escape device (red), 50’ of Escape Tech, Personal Escape (nylon), or Fire Tech rope, an auto-locking carabiner and the new Lightning GT Hook all packed into a strong and durable bag. Made in USA. Weight 3.3 lbs.

Petzl Exo AP Hook w/ Carry Bag
D30AB015  $499.95

Features:
• Multi-purpose anchor hook, usable in locations where the possibility of finding an anchor point is uncertain. Can be used in two ways: around a structure, fixed with a locking hitch or on a window sill, as a last resort

• Self-braking system with anti-panic function for: rapid horizontal movement, going out a window, controlling and stopping a descent: if the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically, and limiting the force transmitted to the user in case of a fall.

• Arimat fiber static rope, 50 foot (15 m) length and 7.5 mm diameter, resists abrasion and high temperatures.

• Am'D connector with CAPTIV positioning bar, to help keep the connector correctly positioned and integrated with the device.

• Fire-resistant carry bag for attaching the system directly to the harness

R&B Rope Bags

236RD Red Large  $43.95
236OR Orange Large  $43.95
The largest of our rope bags. Features a 2” web handle and #5 grommet in the bottom of the bag. This bag will hold 500’-600’ of ¾” rope. 15”L x 17”Dia., 51” Circumference

235RD Red Medium  $33.95
235OR Orange Medium  $33.95
This bag holds the rope that most rescue squads are required to carry. Features #5 grommet in the bottom of the bag, 1½” web handle. This bag will hold 250’-300’ of ½” rope or 200’-250’ of ¾” rope, 14”L x 12” Dia., 37” Circumference

234RD Red Small  $23.95
234OR Orange Small  $23.95
The smallest of our rope bags. Features 1” web handle and #5 grommet in the bottom of the bag. This bag will hold 150’-200’ of ¾” rope or 80’-100’ of ½” rope, 13”L x 8” Dia, 22” Circumference
546NYC Gemtor Class II Fire Service Harness
*Front Leg Strap Adjusters and Single Point Waist Adjustment
Includes Escape System Attachment D-Ring
546NYCL - Left Side Opening (Front Leg Strap Adjusters)
546NYCR - Right Side Opening (Front Leg Strap Adjusters)

541NYC Gemtor Class II Fire Service Harness
*This is the FDNY Personal Harness!
541NYCL - Left Side Opening
541NYCR - Right Side Opening

Features & Benefits of 546NYC & 541NYC
- Fast and Easy Donning
- Can be attached to bunker pants using loops available from most turn-out gear manufacturers.
- Color coded design for easy donning
- Fixed length front, Handle always the same length regardless of adjustment.
- 3-Stage locking Pompier hook with 2” side opening gate available in Aluminum (NFPA General Use Carabiner classified by UL)
- Extremely lightweight, weighs only 2.8 lbs! (Aluminum hook).
- Forged alloy steel escape system attachment D-ring.
- Sturdy, lightweight nylon webbing 1 ¾” wide stitched with high tenacity nylon thread.
- Easy waist belt operation, just engage steel snap hook and D-ring.
- Available with right side or left side (FDNY style) opening
- Unique design lowers the body’s center of gravity and helps reduce the possibility of toppling.
- Can be attached to bunker pants.
- Pompier hook stores at center front position.

541NYC/546NYC $297.00 MAP* (Regular Fits 36”-50”)
541NYC/546NYC $310.50 MAP* (Small Fits 30”-44”)
541NYC/546NYC $310.50 MAP* (XL Fits 44”-56”)

*Manufacturer’s Advertised Prices shown - please call for special pricing

544FR Gemtor Class II Kevlar Fire Service Harness
*Flame Resistant, Includes Escape System Attachment D-Ring

544FR - Class II Harness, Kevlar, Right side opening
- Can be worn externally with loops on outside of bunker pants.
- Can be used with an Escape System (includes escape system sliding D-ring) Made of 1 ¾” wide Kevlar webbing and stitched with high strength Kevlar thread.
- Double layer A-frame and heavy-duty hardware for extreme durability.
- Simple waist connection.
- Adjustable leg straps.
- Standard right side opening. Available with left side opening.

$307.00 MAP*

Note: Harnesses are adjustable within a range but are individually sized. Specify your bunker pant waist size when ordering for internal use. When ordering for external use, provide the measurement of the waistband over the outside of the bunker pants.

PPE MAINTENANCE

PPE Laundry Equipment
ON-PREMISES WASHER-EXTRACTORS

Engineered to deliver an optimal user experience – intuitively designed software allowing operators to navigate and manage system controls, and program cycle settings – with simplicity, efficiency, and confidence.

Features & Benefits
• Fully programmable by keyboard or laptop
• Can hold many wash programs or formulas
• Chemical connections and signal for soap pump
• Soft or rigid mount available
• Robust construction to handle tough loads and extraction forces

*Call For Pricing & Information

Ready Rack Extractor
Model EW30

Features & Benefits
• Easy to use, preprogrammed wash cycles
• Follows NFPA 1851 guidelines for proper PPE maintenance
• Standard power hookup (120v/60Hz - Recommended Breaker - 20amp)
• Utilizes standard plumbing hookups
• Soft mount design, easy install
• Connections available for an optional automatic soap injector
• Front load design
• 30lb. drum holds three to four sets of gear per load
• Dimensions: 29.0” L x 32.0” D x 40.8” H
• Weight: 221 lbs

Turnout Gear Dryers
4, 6 and 8 - Place Bunker Gear Dryers

TARGET HARD-TO-DRY AREAS
Ram Air’s patented design uses powerful fans that push air through gear from the inside out—effectively drying the hard to reach areas and vapor barriers in gear that are prone to mold and mildew if not dried properly. The unique design of our gear dryers limits air loss and prevents air flow from following the path of least resistance. The result? Faster, more efficient drying and an increased ability to dry more suits in the same amount of time.

FLEXIBILITY FOR ALL GEAR COMPONENTS
We know what it is like to work in wet boots and gloves. That is why Ram Air’s 6-MU Gear Dryer comes fully loaded with 18 component ports for drying all accessories including helmets, gloves, boots, face masks and SCBAs. Keeping you dry and comfortable is our job.

FEATURE STRUCTURALLY SUPERIOR CONSTRUCTION
We strive to deliver products that set quality standards beyond any other competitor’s products. Heavy-duty casters provide mobility for the unit; top-quality steel construction of the frame and air passages ensure that Ram Air Gear Dryers are built to last; and a LED timer with automatic shut-off provides easy, efficient drying. We design our gear dryers to be the most structurally superior gear dryers available and stand by them with a full two-year guarantee!

TOUCH SCREEN CONTROL FOR DRYING WITH AMBIENT OR HEATED AIR
A touch screen control on gear dryers gives users immediate visual access to the drying status/dry time remaining and personalized control of dry time/temperature through customized settings. The control features a simple user interface with clearly defined icons. Users can select one of the five drying time presets including a continuous drying option, or they can choose the custom timer option—a feature that allows users to select a custom dry time based on their department’s unique drying needs. When the dryer is in use, the screen clearly displays the drying status using a series of easy-to-understand icons and a timer countdown keeps users abreast of dry time remaining—even at a glance. The touch screen is extremely durable with a smooth flat screen that is easy to clean.

Specifications
• Powder Coated Paint with 12 gauge steel
• Steel stickmen with powder coat paint for hanging fire fighter personal protective equipment with 2" shut off valves
• High volume and high pressure system
• Enclosed motor with noise reduction package
• 360 degree swivel casters on the base
• Removable motor and fan with 360 degree swivel casters with easy quick connect attachment to dryer
• Motor and Fan with an optional 4" or 6" hose barb attachment for drying pumper truck
• 12 accessory drying ports with valves for gloves, helmets, balaclavas
• Operates on a 120v power supply

Special-Ops Gear Dryers
4-Place Immersion/Hazmat Bunker Gear Dryer

When you have special ops teams, Ram Air’s 4-IHT model is your solution for proper gear drying. By allowing for inverted drying, the 4-IHT is able to dry hazmat, immersion and ice-rescue suits that standard gear dryers cannot accommodate while still drying standard bunker gear and accessories. Adjustable to any size gear, the 4-IHT quickly and efficiently dries personal protective equipment without turning gear inside out and causing damage to the gear. Gone are the days of hosing down gear and waiting days for it to dry. With Ram Air’s immersion/hazmat/turnout gear dryers you can rest assured that your gear will be ready when you are!

ADJUSTABLE FOR ANY SIZE GEAR
Gear designed for special emergencies can be large and awkward to handle. Ram Air can accommodate the unique sizes of hazmat, immersion and ice-rescue suits easily. Each of the machine’s four drying positions features adjustable height stickmen to that can be shortened or extended based on the size of the garment.

FULLY NFPA COMPLIANT
Since Ram Air’s 4-IHT models operate using ambient air, manufacturer’s warranties remain intact and the units comply with NFPA 1851/FEMSA recommendations for drying gear.

KEEPING YOU DRY FROM HEAD TO TOE
Working in dry boots, gloves, face masks and SCBA’s makes doing your job safer and more comfortable. Ram Air’s 4-IHT models feature 12 component ports for safely and quickly drying all gear accessories.

QUALITY CONSTRUCTION YOU CAN COUNT ON
Providing top-quality products is our top priority. Heavy-duty casters provide mobility for the unit; top-quality steel construction of the frame and air passages ensure that Ram Air gear dryers are built to last; and a LED timer with automatic shut-off provides easy, efficient drying. We don’t just stand by our products, we guarantee them for a full two years!

LION'S Redzone™ Particulate-Blocking Hood
THE BEST PROTECTION IS PREVENTION.

LION’s RedZone™ Particulate-Blocking Hood protects one of the most vulnerable areas of your body by blocking contaminants from touching your head or neck. Its streamlined, two-layer construction features StedAir® PREVENT particulate blocker for outstanding contaminant protection, wash after wash. RedZone™ also offers exceptional breathability, comfort and mobility. And it doesn’t restrict your hearing during firefighting activities.

• Total particulate protection throughout
• Air-permeable to help manage core temperature and heat stress
• Streamlined, two-layer construction for easy movement, flexibility and unobstructed hearing
• Extended bib design provides optimal shoulder and neck coverage that stays in place
• Ultra-soft, flame-resistant (FR) material for maximum comfort and fire protection
• Extreme durability that maintains its particulate blocking effectiveness even after 100 washes
• Universal sizing that comfortably fits all heads
• Available in Black/Gray and Tan/Gray

HD395142 – LION Particulate Hood, Black/Gray $105.00 MAP
HD395416 – LION Particulate Hood, Tan/Gray $105.00 MAP
*Call for pricing, as our price is below MAP pricing shown

MAJESTIC HOODS

Majestic’s Particulate Hoods - GEN2
Why a Particulate Hood? As we continue to learn more about the harmful contaminants on the fireground, the need for protection against those particulate hazards has become even more crucial. Wearing a particulate hood as part of your turnout gear delivers the additional protection you need while on scene.

• Improved Comfort - The GEN2 has been improved for a more natural feel without compromising protection. Its level of breathability helps reduce heat stress, enabling you to wear the hood longer at the fireground.
• Protection - The GEN2 exceeds the Standard’s particulate-blocking requirements with a protective barrier that blocks more than 99.99 percent of potentially harmful particulates*. This hood delivers reliable protection throughout the entire hood.
• Reliability - The GEN2 hood retains its level of more than 99.99 percent particulate-blocking performance* even after laundering. Its unique inspection opening enables you to inspect the entire hood visually, inside and out.
• Prevention - The GEN2 hood has contrasting colors, white or black on the outside and blue on the inside, helping to prevent cross-contamination.

HOOD-C6-GORE – Gore Particulate Hood Black Ultra Blend C6 $111.95
HOOD-NB-GORE – Gore Particulate Hood Nomex Blend $99.95

Majestic’s PAC II Hoods
PAC II Hoods offer more square inches of protection and is their most popular NFPA approved hood style. The notched shoulder and longer length allows for a proper fit and added protection across the chest. The longer length (3 inches longer than NFPA requires) assures that this hood will stay tucked inside other required equipment. NFPA 1971, UL Certified. Meets or exceeds Cal/OSHA Standards.

HOOD-BC Ultra C6 Carbon Blend Double layer hood and bib $43.95
HOOD-PBI PBI Double layer hood and bib $39.95
HOOD-NOM Nomex Blend Double layer hood and bib $25.95

*Helmets on this page are shown with optional leather fronts.  
*Most helmets are available in your choice of Yellow, Black, White, Red, Blue, Green, or Orange. All Green and Orange helmets have longer lead times and are an additional $20.00.
LION Patent Leather Front
$35.96

- Patent leather front shield for our LION helmets
- Available with two or three panels
- Not available with insignias, medallions or any other decorations

(Order Installed or Loose)

GOLDFIRE SHIELDS

Golfire Shields are made from three layers of 100% Leather. Panels are made from engineered grade vinyl for long life! Each shield is hot glued and stitched to last a lifetime! All shields include metal backer bars!

Many custom designs options and styles are available!
GF4SHIELD - 4" Leather Front - $31.95
GF6SHIELD - 6" Leather Front - $34.95

Standard Leather Colors are Red, Black or White
Other Colors available - Add $2.50

Additional Options:
- Decal - Add $2.50
- Medallion - Add $19.50
- Passport - Add $5.00
- Flag - Add $8.50
- Reflective - Add $2.50
- Colored #s - Add $2.50
- Patent Leather - Add $6.50

Golfire Key Chain Shields
KEY - $15.95

- 2" x 3"
- Exact style as Golfire's Leather Helmet Shields
- 3 layers of 100% leather sewn together
- Available in red, black, and white
- Panel and letter colors are unlimited
- Up to three leather numbers can be sewn in between the panels.

PAUL CONWAY FRONTS

Paul Conway Shields are meant to last. The printing is hot-stamped in colors or foil. Every letter is seared into the surface of the leather, like a brand. There may be easier or faster ways of doing it. But we wouldn’t put our name on them—or yours.

Standard 4” or 6” Leather Front
$47.00

Additional Center Options:
- Decal - Add $5.00
- Metal Disc - Add $5.50
- Brass or Silver Ornament - Add $18.00

*To order shields, please fill out our PAUL CONWAY Leather Front forms found on our website*
Reflective Helmet Crescents

Streamlight Vantage® 180: Helmet/Right-Angle Multi-Function Flashlight

Giving you the ultimate versatility in a firefighter's light, the Vantage 180 goes instantly from a helmet light to a handheld light to a right-angle light.

Lightweight and compact, the VANTAGE® 180 is designed to easily attach above or below full brim Fire and Industrial helmets. The VANTAGE® 180 features a C4® LED main light combined with an ultra-bright blue LED safety tail light or a white safety flood down light mode automatically selected with the rotation of the head. The VANTAGE® 180 is powered by lithium batteries and features the latest in C4® LED technology.

- High-impact, “super-tough” nylon chemically-resistant engineering polymer construction
- Integrated multi-function stainless steel pocket clip for a variety of attachment methods
- Turnout gear attachment hook
- Includes “quick release” helmet bracket and hex key
- IPX7 waterproof to 1m for 30 minutes; 1m impact resistance tested

Streamlight PolyTac® Helmet Lighting Kit

Universal lighting kit fits both traditional and modern style firefighting helmets. It is a low-profile, lightweight, economical alternative for securely mounting a flashlight to almost any style helmet.

- C4® LED technology within a parabolic reflector produces a concentrated beam with optimum peripheral illumination
- TEN-TAP® Programming: Choice of three operating modes
- Solid State power regulation provides maximum output throughout battery life
- High-impact, super-tough nylon polymer for exceptional durability and a superior grip texture to provide a comfortable but slip-resistant feel
- IPX7 waterproof to 1 meter for 30 minutes
- Uses two 3V CR123A lithium batteries (included)

FIRE BOOTS THAT DON'T STOP UNTIL YOU DO
High-Performance First Responder Footwear produced by Thorogood

With dozens of options available, how do you choose the right firefighting boots? A comfortable boot is essential to safety on the fireground because, when your feet hurt, you can lose mobility and stamina. LION Fire Boots by Thorogood brings superior working comfort, safety, and durability.

**Working Comfort** - Rugged, strong and flexible—everything you want in a firefighting boot. Designed to anatomically match the shape of your heel, and ankle guards that provide a comfortable athletic fit.

**Safety** - Simply because safety is paramount, we build in the following attributes throughout our boot line; high traction, flexible cement construction, steel, triple rib ladder shank, impact-resisting ankle protection, Lenzi® midsole, and oversized ladder shin guard.

**Quality** - Our boots have their own unique style, but more importantly, our boots are built to last. Utilizing quality leather, break-through technology in heel padding, safety toe design, and various rugged outsoles, we are confident your boots will stand-up to the multiple tasks you perform every day.

FIREFIGHTER TRAINING PROPS TO HELP YOU TRAIN FOR EVERY CALL

Fighting fires is serious business. You put your safety and health at risk with every call, so you train and work hard learning firefighting techniques to make sure you are prepared for whatever that next call requires.

LION firefighting training props meet that call. They are designed to meet the needs of your fire academy training, fire department training drills, and large-scale training sessions. We make versatile products that can be used over and over again in a variety of scenarios.

LION makes smoke generators to create realistic training environments and rescue mannequins with thermal signatures and voice boxes so they can cough or call for help. We also make the Attack Digital Fire System to simulate lights and fire and a digital nozzle so you can train without water in whatever environment you need.

We also make prop vehicles so your team can learn how to respond to vehicle fires and practice the techniques they need to put those fires out fast. From pressure vessels and automobile props to helicopter training and aircraft wing props, we help you develop the skills you need to get the job done.

For Orders and Questions: Phone 800-759-FIRE or Fax 914-592-3892

**CrewBoss™ Classic Brush Pants**

For decades wildland firefighters have depended on the quality and comfort of the CrewBoss Brush Pant. Over the years we have made adjustments and added features based on real feedback from the fire line. However, at its heart this is the same classic design that you have always loved.

**Features:**
- Certified to current NFPA 1977 Standards.
- Elastic back band for ultimate freedom and comfort.
- Seven oversized belt loops to accept 2” web belts.
- Two generous rear pockets.
- Oversized, extra-deep front slash pockets.
- Extra roomy leg and seat cut.
- Original crotch reinforcement panel.
- Unidirectional cargo pockets prevent snagging
- Hook and loop ankle straps covered with Nomex® fabric for heat resistance.
- Brass, self-locking fly with snap closure.
- Nomex thread throughout.
- Stress points bartacked at 38 locations for maximum durability.
- Available in sizes S-XL, 2XL - Add 10%, 3XL - Add 15%

PORTWEST HI-VIS CLASSIC BOMBER JACKET
UC466 $68.95

ANSI/ISEA 107-2015 TYPE R CLASS 3 & ANSI/ISEA 107-2010 Class 3:2

Made with tough 300 Denier 100% polyester yarn. This is a tough fabric for tough conditions. 300D fabric has superb abrasion and tear resistance. The polyurethane (PU) coating on the inside makes the fabric durable and waterproof, and the outer has a water and stain repellent coating which helps to keep the garment clean.

Standard features:
- 2” Silver reflective tape
- Pack away ergonomically shaped detachable hood
- Detachable sleeves
- Fur liner and collar
- Elasticized waistband and cuffs
- Stormflap with zipper and snap closure
- Waterproof with sealed seams • 7 Pockets
- Available in: Yellow/Black or Orange/Black

Sizes Available:
M (40-41”) L (42-44”) XL (46-48”)
2XL (50-52”) 3XL (54-55”) 4XL (56-58”)
5XL (60-64”)

Self Leveling Floating Strainer
- Increased flow rates due to high intake ratio
- Maximum pump flows
- Lightweight design
- NEW compact design for easy storage
- Available with Storz & Camlock connections

Box Strainer
- Ideal for streams
- Heavy Duty screen
- Two eye hooks on top
- K-Brite finish

Barrel Strainer
- Ideal for marine applications
- Lightweight
- Full flow
- K-Brite or K-Chrome

Low Level Strainer
- Includes Internal screen
- Shown with optional external screen
- Drafts to within 2”
- Compact design
- Pivoting neck
- Jet Siphon included on 4” through 6”
- K-Coat for long life

For Orders and Questions: Phone 800-759-FIRE or Fax 914-592-3892
7982 AKRON REVOLUTION™ INTAKE VALVE w/ 30 Degree Swivel Elbow Inlet

$1680.95

The compact design saves valuable space on your pump panel. The EVOLUTIONARY handwheel blends in with the body and will not obstruct surrounding equipment on the pump panel. It is also easy to grab and adjust, providing simple and easy operator control. Utilizing a ball sector for controlling water flow, the Revolution is reliable and robust providing years of hassle free operation.

- Swiveling intake elbow with locking pin (30° inlet)
- Robust, integrated Pyrolite patent-pending handwheel for easy operation
- Critical pump side waterway components constructed of non-corrosive stainless steel
- Durable, powder coated interior and exterior finish
- Field adjustable relief valve between 50-250 psi (requires 7/8” wrench to adjust).
- Includes 1 ½” NPT female thread
- Quick turn Bleeder valve operation - vents into relief discharge
- Built-in Open/Close position indicator on top of valve
- 2000 gpm max flow
- All parts that stay in contact with water are constructed of stainless steel
- Field serviceable design

7983 Akron Revolution™ Intake Valve (Straight Inlet)  $1622.95

Optional Items for 7982 & 7983:

- 4”, 5” and 6” Storz Cap and Chain $160.95
- 4” or 5” Full-Time Swivel Storz Inlet $241.95
- 6” Storz Inlet $309.95

7980 AKRON BLACK MAX PISTON INTAKE VALVE

$2053.95

Corrosion resistant stainless steel and poly-impregnated aluminum are combined for a durable Piston Intake Valve. A large unique oval waterway increases efficiency while reducing the overall size. All this, plus a special 10 year warranty against corrosion makes the Black Max piston intake valves the obvious choice for today’s fire service.

- Stainless steel piston housing
- Compact size - Extends only 11 15/16” from the pump panel
- 250 psi operating pressure
- Polymer Piston for improved corrosion resistance
- Large waterway with a cast-in turning vane for reduced turbulence and efficient flow
- Pressure relief valve adjustable from 50 - 250 psi (preset @ 150 psi)
- 53° elbow
- 3/4” air bleeder valve

Optional Items:

- 4”, 5” and 6” Storz Cap and Chain $160.95
- 4” or 5” Full-Time Swivel Storz Inlet $241.95
- 6” Storz Inlet $309.95
- Air Bleeder Diversion Hoses $178.95

Harrington H1000 Ball Intake Valve

A low profile,12” depth ball intake valve designed for pumper intake control. Valve meets 900 PSI hydrostatic strength test. Utilizes full flow ball valve design, and has an easy to see visual indicator of ball position. Includes a 3/4” air bleeder valve, an integrated 30-degree elbow, and a 250 PSI field adjustable pressure relief valve (adjustable in increments of 25 degrees from 75- 250 PSI). Friction loss at 1000 GPM: 0.1 PSI. 12” x W. 8” x Ht 16” Wt. 34 lb.

- 4” Storz to 4 1/2” NST Female Swivel $1431.00
- 4” Storz to 5” NST Female Swivel $1403.00
- 4” Storz to 6” NST Female Swivel $1402.00
- 5” Storz to 4 1/2” NST Female Swivel $1405.00
- 5” Storz to 5” NST Female Swivel $1377.00
- 5” Storz to 6” NST Female Swivel $1376.00

Please call for special thread pricing
Harrington H810 Gate Valve w/ 25º Elbow

This LDH hydrant gate valve has the following features: slow open/close, a 25-degree elbow, and low friction loss due to a high flow waterway design. The lightweight gate valve has a non-rising stem, an air bleeder valve, a field adjustable pressure relief valve, an anodized gate, and a stainless steel spindle.

Dimensions: Extension: 12.5” Width: 7” Height: 15” Weight: 24 lbs

Harrington H800 4” Straight Gate Valve

This LDH hydrant gate valve provides low friction loss due to a high flow design. It is excellent for hydrant discharge control, due to providing a slow open/close mechanism. The lightweight gate valve has an air bleeder valve, a non-rising stem, an anodized gate, and a stainless steel spindle.

Dimensions: H: 14” L: 10” W: 6” Weight: 21 lbs Friction loss: 1000 GPM: 0.8 PSI

Harrington H600 Super Flow 2-Way Ball Valve

Large, light-weight 2-way LDH ball valve. Feed two LDH hoses from a single LDH line or one LDH hose from two LDH hoses. The Super Flow ball valve has low friction loss due to a high flow waterway design. Hard anodized balls with stainless steel tappets for corrosion resistance. This design permits feed from either direction. Includes an adjustable pressure relief valve for added safety.

Harrington H700 LDH Hydrant Valve

Excellent for boosting pressure on long hose lays or for boosting low hydrant pressures. The light-weight hydrant valve enables the first-in pumper to lay LDH directly from the hydrant to the fire and when hose lay is completed, start flowing water from the hydrant. If additional pressure is required, another pumper can connect to the Hydrassist valve and start pumping to raise pressure and flow without interrupting the established water supply. The valve provides an emergency shut-down capability. Choose from a variety of sizes of Storz or NST connections. Dimensions: H: 13" L: 12.75" W: 17" Weight: 35 lbs

For Orders and Questions: Phone **800-759-FIRE** or Fax **914-592-3892**
Superior Fire Hose Double Jacket, Rubber Lined, 100% Polyester, 800 Lb. Factory Test.

Superior Fire Hose produces a premium line of double jacketed hoses which are lightweight, flexible and tough.

**Superior EPDM Liner:** EPDM has excellent resistance to ozone, heat and weathering. All liners are extruded in-house where Superior’s quality control department assures thickness and concentricity to the thousands of an inch. EPDM is specially formulated in conjunction with their adhesive blend to give more than double the adhesion to the jacket than required by NFPA.

**Superior Steadfast Coating:** An environmentally safe coating that enhances the hose with superior abrasion resistance and excellent water repellency. Superior’s Steadfast Coating is formulated with polymers and binders that are extremely elastic and do not take away from the natural flexibility of the hose.

### Hose Construction

- Single Jacket 100% High Tenacity Polyester Filament Jacket

- Thermoplastic Lining Laminated to the jacket by the Patented Mertex® Process which creates an exceptionally smooth waterway. 300 PSI Service Test - meets or exceeds spec 5100-187fp

HOSE ACCESSORIES

**HS-150  The 150 Foot Hose Strap  $84.95**

This strap securely holds 50’, 100’, or 150’ of 1 3/4” double jacketed fire hose... the most commonly used attack hose in the fire service. Ideal for cross lays, quick attack lines or standpipe operations. Strap consists of two quick release Velcro closures, interconnected by a stiff nylon spine, Hose remains organized and ready for rapid and easy deployment. The Hose Strap enables a firefighter to grab a fold of hose, shoulder it, and lay it out. Once at your point of attack, straps can be opened and hose advanced. Designed for fire departments that want to deploy an exact amount of 1 3/4” hose to the firescene or to the standpipe station.

**GRP-57  Gripper Hose System  $141.95**

Consists of three heavy duty nylon straps, with a padded shoulder sling, all sewn together to create a hose harness. The shoulder sling has Scotchlite bound edges. Comes complete with fiberglass reinforced cam buckles and torque rings that cinch up the bundle during transport. Ideal for transporting hose assemblies to the fire ground or up the stairs to a standpipe location.

**Hose Rollers**

For easy removal of air and water from hose. Simply walk the hose. For use up to 5” LDH

- **HHR-2**  Two Man Hose Roller  $138.50
- **HHR-1**  One Man Style Hose Roller  $156.50

**HHW-300  Harrington Hose Washer  $555.50**

Harrington hose washers, easy and efficient method to wash and clean your hoses.

For hoses up to 3”. Just connect a supply line with up to 60 PSI pressure and feed your dirty hose into the washer and out comes a much cleaner hose.

Includes a carrying handle and supporting feet. Constructed of durable lightweight aluminum. Available in 1.5” or 2.5” NH-female inlet swivel connection.
Akron UltraJet Nozzle

Now you can have the best of both worlds in a handline nozzle. The UltraJet nozzle is all-in-one, combining both smooth bore and fog patterns. This nozzle has simple operations with no additional training required. Available with 1" (25 mm), 15/16" (24 mm), 7/8" (22 mm) or 3/4" (19 mm) tips. Low Pressure operation at 50 psi/3.5 Bar.

1820 UltraJet Nozzle - 1.5" or 2.5" Inlet $969.95

Akron ProVenger™ Nozzle

The patent pending ProVenger series of handline nozzles combine years of designing and manufacturing experience with superior performance and dependability; all at an unbeatable value. Available in selectable and fixed gallonage, the Avenger global platform offers great stream quality and a simple design. Durable, reliable and affordable, the Avenger.

- Lightweight fog and straight stream nozzle with multiple fixed or constant gallonage settings
- Great stream performance • Raised lug on the bumper for easier pattern identification
- Multiple pattern detents • Easy to operate with simplified nozzle training
- Integrated control ring does not require you to flush the nozzle without shutting down
- Quick change pattern adjustment (90 degrees of rotation from Straight Stream to Full Fog)
- NFPA Compliant • Meets European CE Standard (Must Specify)
- 5 Year Warranty

Akron Zero Torque™ Nozzles

The Zero Torque (ZT) nozzle is the first nozzle specifically designed with ergonomics, handling, control and reduced firefighter fatigue in mind. The ZT naturally keeps the nozzle out in front of the firefighter to allow for easier operation and provide better control. In addition the pistol grip and inlet swivel are positioned to eliminate the reaction force torque found in all conventional pistol grip designs. Conventional pistol grip nozzles are held at a position 3 1/2" to 4" below the center line of discharge, creating a natural torque which must be resisted by the firefighter. The ZT is positioned to eliminate the torque, leaving only the straight reaction force for the firefighter to resist. The ZT is available on any 1 1/2", Mid-Range, Wide-Range, and 2 1/2" Turbojet or Assault nozzle.

Superior Handling: The ZT pistol grip and inlet swivel are positioned to eliminate the reaction torque found in conventional designs providing reduced short-term fatigue and better overall handling.

Assault Nozzles combine quality stream performance at a variety of pressures with the simplicity of a fixed orifice. Quality stream performance at a variety of pressures, combined with a durable and simple design makes it an unbeatable value. This product has a variety of applications. For use as deicing nozzles or in firefighting, mining or specialty vehicle applications, the Assault Nozzle is versatile and durable.

**Features:**
- Better stream performance at pressures as low as 50 PSI
- No recalibration required
- Pattern Identification
- Raised lug marks straight stream for limited visibility operations
- Affordably priced
- Low maintenance due to simple, durable design
- Larger easy to read labels
- Easy to operate (1/4 turn from straight stream to fog)
- Simplified nozzle training
- Quick change pattern adjustment

**4802 Akron 1” Low-Range Assault Nozzle With Pistol Grip $611.95**
- 100 psi. Maximum hydrostatic pressure 580 psi.
- Compatible with Quick-Attack Foam Tube Style 790
- Nozzle is standard with Pistol Grip and Spinning Teeth
- FM Approved
- 13, 25, or 40 GPM (must specify)
- Swivel 1” Inlet
- Length 8 15/16”
- Weight 3 1/4 lbs

**4863 Akron 1½” Mid-Range Assault Nozzle With Pistol Grip $608.95**
- Improved handle with extra room for 1-3/4” hose
- Tough, black nozzle body hard coat
- Enhanced flow characteristics (deeper throat design)
- Meets European Standard
- Specify Pressure and Flow
- Compatible with Quick-Attack Foam Tube Style 796
- Removable Pistol Grip
- 1 1/2” Full-time Swivel Inlet
- Length 9”
- Weight 4 1/4 lbs

**4826 Akron 1½” or 2½” High Range Assault Nozzle With Pistol Grip $784.95**
- Enhanced flow characteristics with a deeper throat design
- Specify Pressure and Flow
- Nozzle is standard with Pistol Grip and Spinning Teeth
- FM Approved (specific models)
- Swivel 1-1/2” or 2-1/2” Inlet
- Length 12-1/8”
- Weight 7 5/8 lbs

**4824 Akron 1½” High-Range Assault Tip $552.95**
- Specify Pressure and Flow
- Nozzle is standard with Spinning Teeth
- Swivel 1 1/2” Inlet
- Length 8 1/4”
- Weight 5 1/4 lbs

**4866 Akron 1½” Mid-Range Assault Tip $473.95**
- Specify Pressure and Flow
- Nozzle is standard with Spinning Teeth
- Swivel 1 1/2” Inlet
- Length 6 1/2”
- Weight 2 3/4 lbs

**Nozzle Color Clip Kit**
Your Assault nozzle will include a free nozzle color code kit, if requested. No mechanical fasteners, simple to switch, just snap-on. Includes (6) bail handle clips and (6) pistol grip clips in the following colors: Black, Blue, Green, Orange, Yellow, White
The Akron® Turbojet Nozzle is unmatched in today’s fire service for its flexibility and flow control. The Turbojet is a constant gallonage nozzle (flow remains the same in all patterns) with multiple flow settings for operator flow control. Use the Turbojet one time and it is easy to see why it’s the nozzle of choice by firefighters worldwide.

Features:
- Pattern Identification
- Larger more legible labels
- Raised lug marks straight stream for limited visibility operations
- Simple to operate (1/4 turn from straight stream to fog)
- Easy to service & repair

1702 Akron 1” Turbojet Nozzle
With Pistol Grip $712.95
- Flow setting at 100 psi (7 bar) operating pressure (230 psi/16 bar maximum operating pressure), maximum hydrostatic pressure 40 bar
- Compatible with Quick-Attack Foam Tube Style 790
- Removable pistol grip
- Type Selectable Gallonage
- GPM 13-25-40-60*
- Swivel 1” Inlet
- Length 9 1/4”
- Weight 3 lbs

1703 Akron 1½” Turbojet Tip $461.95
- Flow setting at 100 psi (7 bar) operating pressure (230 psi/16 bar maximum operating pressure), maximum hydrostatic pressure 40 bar
- Compatible with Quick-Attack Foam Tube Style 790
- For use on Style 753 shutoff
- Type Selectable Gallonage
- GPM 13-25-40-60*
- Swivel 1 1/2” Inlet
- Length 6 5/8”
- Weight 1 3/4 lbs

1704 Akron 1” Turbojet Nozzle
With Pistol Grip $740.95
- Flow setting at 100 psi (7 bar) operating pressure (230 psi/16 bar maximum operating pressure), maximum hydrostatic pressure 40 bar
- Compatible with Quick-Attack Foam Tube Style 790
- Removable pistol grip
- For use on Style 753 shutoff
- Type Selectable Gallonage
- GPM 18-30 or 13-23-30*
- Swivel 1” Inlet
- Length 9 1/4”
- Weight 3 lbs

1711 Akron 1½” Turbojet Nozzle $499.95
- Flow setting at 100 psi (7 bar) operating pressure (230 psi/16 bar maximum operating pressure), maximum hydrostatic pressure 40 bar
- Compatible with Quick-Attack Foam Tube Style 790
- For use on Style 753 shutoff
- Type Selectable Gallonage
- GPM 18-30 or 13-23-30*
- Swivel 1 1/2” Inlet
- Length 6 5/8”
- Weight 3 3/4 lbs

For Orders and Questions: Phone 800-759-FIRE or Fax 914-592-3892
1763 Akron 1½” or 2½” Wide-Range Turbojet Nozzle
With Pistol Grip $763.95
- Flow setting up to 100 psi (7 bar) standard, 75 psi (5 bar) optional
- Compatible with Quick-Attack Foam Tube Style 796
- Removable pistol grip
- Type Selectable Gallonage
- GPM 30-95-125-150-200 or 115-360-475-550-750
- Swivel 1 1/2" Inlet Standard or Optional 2 1/2" Inlet
- Length 11"
- Weight 5 3/4 lbs

1766 Akron 1½” Wide-Range Turbojet Tip $547.95
- Flow settings at 100 psi (7 bar) standard, 75 psi (5 bar) optional
- Compatible with Quick-Attack Foam Tube Style 796
- Type Selectable Gallonage
- GPM 30-95-125-150-200
- Swivel 1 1/2" Inlet
- Length 7 1/2"
- Weight 3 1/2 lbs

1723 Akron 1½” Mid-Range Turbojet Nozzle
With Pistol Grip $854.95
- Flow setting up to 100 psi (7 bar) standard, 75 psi (5 bar) optional
- Compatible with Quick-Attack Foam Tube Style 793
- Removable pistol grip
- Type Selectable Gallonage
- GPM 95-125-150-200
- Swivel 1 1/2" Inlet
- Length 10 3/4"
- Weight 6 1/2 lbs

1737 Akron 1½” Mid-Range Turbojet Tip $581.95
- Flow settings at 100 psi (7 bar) standard, 75 psi (5 bar) optional
- Compatible with Quick-Attack Foam Tube Style 793
- Type Selectable Gallonage
- GPM 95-125-150-200
- Swivel 1 1/2" Inlet
- Length 6 5/8"
- Weight 4 1/2 lbs

1733 Akron 2½” High-Range Turbojet Nozzle
With Pistol Grip $919.95
- Flow setting up to 250 GPM (950 LPM) at 100 psi (& bar) standard, 75 psi (5 bar) optional
- Compatible with Quick-Attack Foam Tube Style 770
- Removable pistol grip
- Type Selectable Gallonage
- GPM 125-150-200-250
- Swivel 2 1/2" Inlet
- Length 11 1/2"
- Weight 6 3/4 lbs

1744 Akron 1½” High-Range Turbojet Tip $615.95
- Flow setting up at 100 psi (& bar) standard, 75 psi (5 bar) optional
- Compatible with Quick-Attack Foam Tube Style 770
- Type Selectable Gallonage
- GPM 125-150-200-250
- Swivel 1 1/2" Inlet
- Length 6"
- Weight 4 1/2 lbs

Nozzle Color Clip Kit
Your Turbojet nozzle will include a free nozzle color code kit, if requested. No mechanical fasteners, simple to switch, just snap-on. Includes (6) bail handle clips and (6) pistol grip clips in the following colors: Black, Blue, Green, Orange, Yellow, White

For Orders and Questions: Phone 800-759-FIRE or Fax 914-592-3892
Pyrolite shutoff with pistol grip and straight tip for high volume low pressure application. The Blitz Tips deliver nearly 400 GPM at 50 psi pilot pressure.

The Chief XD takes the industry standard for handline nozzles to a whole new level. It offers accurate high volume flows at low tip pressures and is built tough like no other nozzle for Xtreme Duty, or XD. The Chief XD is the only handline nozzle that offers a forged shutoff body and forged metal bale handle for maximum strength. It also includes as standard a full round metal ball for the best stream performance, as well as fixed molded urethane or spinning stainless steel metal teeth that don’t break. All indicators and markings are laser etched, with no labels to peel off or scratch. Ergonomic grip inserts help with handling and can also be color coded. It’s durability and efficiency ensures an embedded level of safety for you and your crew, fire after fire.

- Accurate & wide range of flows
- Available with 50, 75, or 100 psi operating pressure
- Fixed gallonage from straight stream to full fog
- Forged aluminum shutoff body and bale handle
- Laser etched markings
- Dual drive shutoff with full round metal ball
- Spinning stainless steel or fixed molded urethane teeth
- Color coded bumper along with bale handle & pistol grip inserts

- Bumper, bale handle, and pistol grip insert color (orange standard on XD)
- Color Options: Red, Yellow, Green, Blue, Black, Glow
- Spinning stainless steel metal teeth (standard) or fixed molded urethane teeth
- Inlet threads

**Elkhart Brass XD Shutoffs**

Designed and constructed for rugged use and reliable performance. They are built strong with forged shutoff bodies and forged metal bale handles earning the title Xtreme Duty, or XD. They provide an excellent foundation for break-apart applications using smooth bore or fog nozzle tips. Elkhart Brass XD Shutoffs are available with a variety of options, including built-in smooth bore discharges that can be used with fog nozzle tips for maximum versatility.

- Dual drive shutoff with full round metal ball
- Forged metal bale handle
- Color coded pistol grip and bale handle inserts
- Attention to detail in waterway alignment and smoothness of operation throughout

The Apollo™ family of portable monitors can get the job done when seconds count. Choose either a Dual or Single Inlet Portable Monitor with an optional Direct Mount flange. All are available in either the standard version or new Hi-Riser™.

The entire Apollo monitor family incorporates proven performance, more durability and better stability to generate powerful streams and higher flows. These features and more make the Apollo the monitor of choice by users who need more reliable performance.

- Full 360° rotation in Deck mode - 180° rotation with built-in safety stops in Portable mode
- Vertical travel approaching 90° above to 15° below horizontal with a built-in 35° safety stop
- Full 3" waterway with built-in turning vanes in each elbow for maximum efficiency and lower friction loss - No more than 10 psi at 800 gpm (.7 bar at 3030 lpm)
- Multiple applications - Use as a Portable Monitor or add the Direct Mount flange for Deck Operation
- Quality Locking System - Simple, heavy-duty dual lock pins for quicker and easier assembly and more positive locking
- Direct Mount - A combination 3" NPT Female and 3" Flange allows for easy setup for Deck Operation
- More water on the fire with a harder-hitting, low fallout straight stream
- Sturdy ground base helps maintain stability
- Ground Base folds for easy storage in a standard compartment

APOLLO SINGLE INLET MONITORS
Flows up to 1250 gpm (4800 lpm) in the deck mode and 1000 gpm (3800 lpm) in the portable mode. Choice of ground bases: 4", 4 1/2", 5" female swivel, 4" or 5" storz inlet (must specify) x 2 1/2" threaded male outlet

3416  Apollo Single Inlet Portable and Deck Monitor
Includes a ground base, liftoff, and direct mount

MERCURY QUICK ATTACK LE PORTABLE MONITOR

Hit Low, Hit Hard and Hit Far with the NEW Mercury™ Quick Attack LE Portable Monitor.

The Mercury Quick Attack LE sets a new standard in the market and is the only portable monitor that meets NFPA 1964 and EN-15767-1. It is compact and lightweight at 15 pounds and flows 500 GPM. Now even better, it can hit low at 10° and far up to 250 feet at 100 psi. Easy and quick to deploy, friction loss is minimal.

- Hits low at 10°
- Improved reach up to 250 feet at 100 psi when paired with the new Mercury nozzle (Style 4446)
- Compact size & weighing only 15 lbs for quick deployment
- Meets NFPA 1964 and EN-15767-1
- Easy open/close valve
- Strap attached with bag for easy stowing
- Knurled handle for improved grip
- Handle wiper to minimize debris collection
- Elevation range of +10° to +50°
- Rotation ± 20°
- Rated flows up to 500 gpm (1900 lpm)
- Low 6 psi friction loss at 500 gpm
- Maximum operating pressure of 230 psi
- Exceeds the standard of 200 psi

3444 Mercury Quick Attack Monitor $1599.95 (monitor only)

The Stinger®

The model 8297 portable monitor, the Stinger®, is one of today’s most versatile master stream appliances. The unique design of this monitor allows it to be easily removed from its portable base and placed on a top mount adapter or top mount fixture for use as a deck gun. The compact, folding base can then be stored in a compartment or pre-connected in the hose bed for use as a “Bomb” line. The Stinger® is truly a double-duty firefighter!

Features:
- Durable, Lightweight Elk-O-Lite® construction
- Flow Efficient 3.0” Waterway
- Fully Enclosed Worm Gear
- Folding Legs on Portable Bases
- Safety Stop at 35° Above Horizontal
- Convenient Carrying Handle
- Positive Horizontal Twist Lock
- Grease Fitting for Ease of Lubrication
- 360° Horizontal Rotation (In Deck Mount Mode)
- 95° Vertical Travel (In Deck Mount Mode)
- Locking, Free Swivel Storz Connectors
- Six Portable Base Options
- Two Deck Mount Options
- 282A Stream Shaper
- ST-194 Triple Stacked Tips
- 10’ Safety Chain

Benefits:
- Years of Dependable Service
- Two Guns in One/Deck or Portable
- Minimal Friction Loss
- Easy to Deploy by One Person
- Stores Easily/Compartment or Tailboard
- Pre-connect Base for “Bomb” Load
- Supply with 2.5”, 3.0”, or LDH in Portable Mode
- Safe Operation up to Maximum Flow Limits
- Pre-pipe for Top Mount Installation
- Supply Deck Mount with 1 or 2 Pony Lengths
- Easy, Minimal Field Maintenance
- Elkhart Quality

8297-10 Stinger® Upper Unit

Durable, lightweight Elk-O-Lite construction • Can be deployed on any of 6 portable bases • Can be utilized on either of 2 top deck mount fixtures • Carrying handle doubles as quick release mechanism • Full 3.0” unobstructed waterway for flow efficiency up to 1250 GPM • Handwheel driven, vertical worm gear fully enclosed for protection from the elements • Grease fitting for easy lubrication • Vertical travel from 70° above to 25° below horizontal in deck mount mode • Safety stop at 35° above horizontal for portable mode • Full 360° travel in deck mount mode with positive twist lock • Liquid filled pressure gauge • Flow rated at: 1250 GPM in deck mount mode; 1000 GPM with single inlet portable base; and 800 GPM with the double 2.5” portable base • Standard with 282A stream shaper and ST-194 quad-stacked tips • Optional with any master stream combination fog nozzle (see pages 15, 16, 17, & 35) • Finish red acrylic/urethane enamel with hard anodized trim.

8297-25 Stinger® Portable Monitor (2-2.5” Swivels)

8297-10 upper unit complete with portable base • For flows up to 800 GPM • Two 2.5” clappered, female swivel inlets • Base body constructed of durable, lightweight Elk-O-Lite • Rugged, cast Almag legs lock in place for deployment and fold for compact storage • Furnished with 10’ safety chain • Finish red acrylic/urethane enamel with hard anodized trim.

8297-35 Stinger® Portable Monitor (3.5” Swivel/Not Shown)

8297-10 upper unit complete with portable base • For flows up to 1000 GPM • One 3.5” female R/L free swivel inlet • Base body constructed of durable, lightweight Elk-O-Lite • Rugged, cast Almag legs lock in place for deployment and fold for compact storage • Furnished with 10’ safety chain • Finish red acrylic/urethane enamel with hard anodized trim.

8297-40 Stinger® Portable Monitor (4.0” Swivel)

8297-10 upper unit complete with portable base • For flows up to 1000 GPM • One 4.0” female R/L free swivel inlet • Base body constructed of durable, lightweight Elk-O-Lite • Rugged, cast Almag legs lock in place for deployment and fold for compact storage • Furnished with 10’ safety chain • Finish red acrylic/urethane enamel with hard anodized trim.

8297-41 Stinger® Portable Monitor (4.0” Storz/Not Shown)

8297-10 upper unit complete with portable base • For flows up to 1000 GPM • One 4.0” free swivel, locking Storz inlet • Base body constructed of durable, lightweight Elk-O-Lite • Rugged, cast Almag legs lock in place for deployment and fold for compact storage • Furnished with 10’ safety chain • Finish red acrylic/urethane enamel with hard anodized trim.

Continued - Pricing on next page
8297-45 Stinger® Portable Monitor
(4.5” Swivel/Not Shown)
8297-10 upper unit complete with portable base • For flows up to 1000 GPM • One 4.5” female R/L free swivel inlet • Base body constructed of durable, lightweight Elk-O-Lite • Rugged, cast Almag legs lock in place for deployment and fold for compact storage • Furnished with 10’ safety chain • Finish red acrylic/urethane enamel with hard anodized trim.

8297-51 Stinger® Portable Monitor (5.0” Storz)
8297-10 upper unit complete with portable base • For flows up to 1000 GPM • One 5.0” free swivel, locking Storz inlet • Base body constructed of durable, lightweight Elk-O-Lite • Rugged, cast Almag legs lock in place for deployment and fold for compact storage • Furnished with 10’ safety chain • Finish red acrylic/urethane enamel with hard anodized trim.

8297-98 Stinger® Deck Gun
8297-10 upper unit complete with 8298 top mount adapter for deck gun application • For flows up to 1250 GPM • Finish red acrylic/urethane enamel with hard anodized trim.

8297-99 Stinger® Deck Gun
8297-10 upper unit complete with 8299 deck mount fixture for deck gun application • For flows up to 1250 GPM • Finish red acrylic/urethane enamel with hard anodized trim.

8298F Top Mount Adapter For Stinger®
Durable, lightweight Elk-O-Lite construction • Allows 8297-10 to be utilized as a pre-plumbed deck gun • Fits 3.0” -150# ANSI flat face flange • Finish hard anodized.

8299 Deck Mount Fixture For Stinger®
Durable, lightweight Elk-O-Lite construction • Bolts to top deck plate to allow 8297-10 to be utilized as pre-connected deck gun • Two 2.5” clappered swivel inlets • Keep one or both connected to discharge outlets with pony lengths of 2.5” or 3.0” hose • Finish red acrylic/urethane enamel hard anodized trim.

8297MB Storage Bracket for Stinger®
Constructed of durable, lightweight Elk-O-Lite with steel spring clips • Designed to hold “Stinger” portable base securely in place when in storage • Finish cast Elk-O-Lite.

Stinger® Extras
One of these master stream, combination fog nozzles will augment the fire suppression capabilities of the Stinger®. All three models offer excellent straight steam quality, superb fog patterns, and are ideal for use with AFFF.

CSW Select-O-Flow® Nozzle
Durable, lightweight Elk-O-Lite construction • Constant flow/select gallonage: 300, 550, and 750 GPM settings (1135, 2080, and 2840 L/min) • Excellent straight stream quality • Pattern easily changed under flowing conditions • Excellent for AFFF application • Gallonage easily changed under flowing conditions (even down to shutoff position) • 2.5” swivel base • Finish hard anodized with chrome plated trim.

CSW-L Select-O-Flow® Nozzle
Durable, lightweight Elk-O-Lite construction • Constant flow/ select gallonage: 500, 750, 1000, and 1250 GPM settings (1892, 2840, 3785, and 4730 L/min) • Excellent straight stream quality • Pattern easily changed under flowing conditions • Excellent for AFFF application • Gallonage easily changed under flowing conditions (even down to shutoff position) • 2.5” swivel base • Finish hard anodized with chrome plated trim.

SM-1000 Select-O-Matic® Nozzle
Durable, lightweight Elk-O-Lite construction with stainless steel mechanism • Flows 300 to 1000 GPM • Adjusts automatically to flow fluctuations to maintain effective pressure and efficient steam • Pattern easily changed under flowing conditions • Excellent for AFFF application • Gallonage easily changed under flowing conditions (even down to shutoff position) • 2.5” swivel base • Finish hard anodized with chrome plated trim.

PORTABLE FOAM EDCUTORS

The first necessity of any handline foam system is a means of introducing foam concentrate into the water supply. The simplest, most efficient, and least expensive means of doing this is a portable foam eductor.

These "Venturi Type" eductors are constructed of rugged brass alloys. Their efficient and simple design assures the lowest possible friction loss. The metering devices on all these eductors are easily removed for cleaning or for training and are designed with a stainless steel ball check to prevent foam contamination when the line is shut down. They are also furnished with clear PVC pick-up hose and a removable, easy to clean pick-up screen.

The metering device on the 60, 95, and 125 GPM eductors has 5 settings: 1%, 1%, 3%, 6%, and 0%. (Positive shutoff). The metering device on the 30 and 250 GPM eductor has 5 settings from 0 to 6%. Both devices are extremely suitable for todays fire-fighting foams: AFFF, Alcohol Type AFFF, Fluoroprotein, Class A foam, etc.

241 IN-LINE FOAM EDUCTOR

Available in 30, 60, 95, 125, and 250 GPM flows - Detachable metering device - Rugged brass construction - 60 and 95 GPM models are FM approved with SFL and 244 - Choice of free-swivel inlets (see chart below) - Finish red acrylic/urethane enamel with Satin Brass or Chrome plated trim.

240 BY-PASS FOAM EDUCTOR

By-pass valve allows for water only operations at lower inlet pressures
- Available in 60, 95, and 125 GPM flows - Detachable metering device - Rugged brass construction - 60 and 95 GPM models are FM approved with SFL and 244 - Choice of free-swivel inlets (see chart below) - Finish red acrylic/urethane enamel with chrome plated trim.

241-N NAVY IN-LINE FOAM EDUCTOR

90 GPM flow - Detachable metering device is not adjustable (either 3 or 6%) - Rugged brass construction - Reinforced clear PVC pick-up hose - ½" swivel inlet - Finish cast brass.

FOAM AERATION TUBES

The combination fog nozzle is ideal for the application of AFFF for these reasons: It has far greater reach than an air aspirating nozzle so initial attack can be made from a greater distance; it has the capability of a wide fog pattern for personal protection; it gives the AFFF solution sufficient expansion to extinguish hydrocarbon fires.

There are occasions, however, when greater expansion rates are needed to properly apply a foam solution; polar solvent fires, using fluoroprotein foam, securing spills, etc. For these special situations a foam aeration tube can be quickly and easily attached to the combination fog nozzle to enhance the expansion of the foam solution.

244 FOAM TUBE

For adding more air to foam solution to achieve thick, wet foam blanket - Quickly attaches to SFL, SFL-G, SFL-N, and SFL-GN nozzles - Durable, lightweight Elk-O-Lite construction - Cast finish with nylon cord wrap - Length, 40 ½" - Weight, 4 ½ lbs.

246 FOAM TUBE

For adding more air to foam solution to achieve thick, wet foam blanket - Quickly attaches to 4000-02, 4000-03, 4000-10, 1000-13, SFL-B, SFL-BG, SFM, SFM-G, SM-OF, SM-OFG, SM-20F, and SM-20FG nozzles - Durable, lightweight Elk-O-Lite construction - Cast finish with nylon cord wrap - Length, 30" - Weight, 4 ½ lbs.

247 FOAM TUBE

For adding more air to foam solution to achieve thick, wet foam blanket - Quickly attaches to SM-30F, SM-30FG, and DSM-30F nozzles - Durable, lightweight Elk-O-Lite construction - Cast finish with nylon cord wrap - Length, 30" - Weight, 4 ½ lbs.

“Always at the Heart of the Fire Service”
Quick-Attack™ Foam Aeration Tubes
Akron Brass Quick-Attack™ Foam Aeration Tubes have been newly designed and manufactured using different materials. New tubes will now be constructed of aluminum and a lightweight durable, high strength polymer, equipped to handle day-to-day firefighting conditions. They are designed to easily and quickly clamp onto various Akron Brass nozzles.

Features of In-line and By-Pass Eductors shown above
* Infinite number of settings between 0% and 6%
* Performs well with 75 psi and 100 psi rated nozzles
* Detents at 1/4%, 1/2%, 1%, 3% and 6%
* Larger, easier to read metering dial with positive position stops
* Rated flow calibrated at 200 psi inlet pressure
* Pickup tube of reinforced clear PVC hose to help prevent kinking
* Ideal for training without foam
* Retrofit kits available for old style Akron Eductors

FIREPOWER - Class A Foam

FIREPOWER is highly versatile and can be used with a wide range of equipment for different methods of application. It is intended for use at 0.1% to 1.0% depending on the method of application:
1) Structural attack- conventional nozzles at 0.5-0.7% proportioning rate.
2) Wildland Ground attack- air aspirating nozzle at 0.3% proportioning rate, 0.1% rate for mop up.
3) Aerial attack- fixed or rotary wing delivery systems at 0.3% proportioning rate.
4) CAF system- compressed air foam systems at 0.1-0.5% proportioning rate.

TRAINOL - Training Foam

Angus Trainol is a specially formulated mixture of synthetic materials which produces a high quality foaming agent for use with Liquefied Petroleum Gas fire training simulators. LPG training simulators are becoming increasingly popular as fire professionals struggle to balance regulations governing air pollution and other environmental considerations, with the need to ensure personnel achieve an acceptable level of preparedness to enable them to respond effectively in the event of a real fire incident. Angus Trainol meets these exacting requirements. Designed for proportioning at between 1% and 3% depending on the foam generating equipment used. This low proportioning rate guarantees the most cost-effective solution for effective Class B fire training programs. Also, when equipment permits, reduction in the proportioning rate below 3%, a corresponding directly-relational improvement in environmental impact is achieved.

Warning: Trainol is designed for use exclusively as a training foam. Under no circumstances must Trainol be used to fight Class B flammable liquid fires.

TRIDOL - Aqueous Film Forming Foams (AFFF)

Tridol is a cost-effective synthetic Aqueous Film-Forming Foam (AFFF) concentrate for extinguishing and securing flammable hydrocarbon liquid fires.

Tridol is a unique combination of hydrocarbon and fluorochemical surface active agents. It produces a vapor-sealing aqueous film that spreads rapidly over the fuel surface to provide rapid control and extinguishment.
• Film-forming for fast flame knockdown and extinguishment.
• Burnback resistance and post-fire security.
• Foam blanket reseals when ruptured by personnel or equipment.

* Angus AFFF Concentrates do not contain PFOS

TRIDEX - Alcohol-Resistant - Aqueous Film Forming Foam (AR-AFFF)

Tridex AR-AFFF is a cost-effective Alcohol-Resistant Aqueous Film-Forming Foam (AR-AFFF) concentrate for extinguishing and securing flammable hydrocarbon and polar solvent liquid fires.

Tridex AR-AFFF is a unique combination of hydrocarbon and fluorocarbon surface active agents. It produces a vapor-sealing aqueous film that spreads rapidly over hydrocarbon surfaces to provide rapid control and extinguishment. On polar solvents an insoluble polymer membrane is formed which protects the foam blanket from the solvent.
• Highly versatile, eliminates the need to stock a variety of foam types.
• Film-forming on hydrocarbons for fast flame knockdown and extinguishment.
• Burnback resistance and post-fire security.
• Foam blanket reseals when ruptured by personnel or equipment.

* Angus AFFF Concentrates do not contain PFOS

Fol-Da-Tank Portable Collapsible Tank

Two people can unload Fol-Da-Tank from the truck and set up in less than 30 seconds. Your choice of frames include a frame that is resistance welded 14-gauge 7/8" steel tubing with a snag free finish, or a frame fabricated of aluminum square tube, which is 26% lighter than steel. Both frames utilize die cut cadmium-plated hinges, solid brass grommets and heavy duty bolts.

Fol-Da-Tank Self-Supporting Tank

One person can unload this Fol-Da-Tank from the truck. These self-supporting frameless portable water tanks have been designed to meet the most stringent requirements of rural/urban fire fighting. As the self-supporting tank begins to fill with water, its unique design allows it to become self-supporting automatically. Constructed from heavy duty safety orange Vinyl (PVC) with all seams welded for longer life. Includes 4 support rings and a compact storage bag. Supplied with one threaded flange coupling installed. Your choice of 1 1/2" thru 6" NST or IPT male or female (Please Specify).

VANGUARD POWERED HIGH POWER VOLUME PUMP

This pump equipped with a Vanguard motor is available with one (PFP-18hpVGD-1D) or two delivery outlets (PFP-18hpVGD-2D), depending on your needs. The engine and pump are mounted on a steel protective frame with folding handles.

CET FIRE PUMPS VANGUARD 18 HP

PFP-18hpVGD-1D $4683.95
PFP-18hpVGD-2D $5208.95

DESCRIPTION
• Air cooled 18hp Vanguard, OHV, V-Twin
• Centrifugal pump with brass impeller and aluminum casing.
• Mechanical seal and wear ring
• Stainless steel shaft pump
• 1 ½¨ discharge with ¼-turn ball valve
• 2 1/2¨ suction
• Compact (20’x 23’x 23’ H)
• Weight : 165 lbs.
• Exhaust priming system up to 20 ft suction head
• One battery 12 volts
• 100 watt alternator
• Protective rack with 4 folding handles (option)
• Exhaust pipe guard
• Discharge pressure gauge.
• 6 gallons (22 l) detachable fuel tank. The fuel tank is made from plastic

• -1D has one 2 1/2" (65 mm) delivery outlet with 1/4-turn ball valve
• -2D has two 2 1/2" (65 mm) delivery outlets with 1/4-turn ball valve
• One 4" (100 mm) suction inlet

INCLUDED ACCESSORIES
• Swivel spotlight
• 36 watt alternator
• Pressure gauge
• Low oil alert
• 12 volt battery

PERFORMANCE
250 GPM @ 50 PSI
150 GPM @ 100 PSI
100 GPM @ 150 PSI
25 GPM @ 200 PSI

The entire line of CET PUMPS is available - Visit our website or call for details!

**SUPER VAC V18 VALOR SERIES**

**THE MOST VERSATILE BATTERY FAN HAS ARRIVED!**

**V18-BD WITH DEWALT LITHIUM ION BATTERY OR V18-BL WITH MILWAUKEE RED 18V BATTERY**

**YOUR BATTERY ARSENAL JUST GREW!**

Never in firefighter history has one fan worked with your department’s other battery-operated tools. Until now. The all-new Super Vac 18” variable-speed battery fan, equipped with dual DeWalt or Milwaukee batteries, is the most swappable PPV interface on the market. Finally, the industry can turn to a fan with a trusted battery name that pairs with Super Vac’s dependable history.

Featuring:
- Curved Handle
- Compact, Roll-Cage Frame
- Stream Shaper Guard
- Polymer Blade
- Optional Shore Power
- Standard Flat-Proof Rubber Tires
- Only 46 lbs. and Still Super Vac Tough
- AMCA Certified Up to 45 minutes of Run Time*

*180° of Separation as shown below:

For Orders and Questions: Phone 800-759-FIRE or Fax 914-592-3892
Smoke ejectors come complete with all of the features that make Super Vac the most respected name in emergency ventilation. The heart of these units is the patented, cast aluminum, 4 blade, recurve propeller designed specifically for smoke ejection. Poured in Super Vac’s foundry of the toughest aircraft alloys, the blade is the perfect combination of a low noise, high output design. The power comes from your choice of totally enclosed (S) or hazardous location (SE or E) electric motors. All motors come with a factory approved two year warranty and will run on 110 or 220 Volts. The rest of the fan is covered by Super Vac’s five year warranty. The Super Vac smoke ejector is a proven performer in the toughest situations. All Super Vac smoke ejectors feature a square construction for strength and stability. With handles on every corner, these units are easy to handle and can be stacked or hung using Super Vac accessories. These units are designed to accept spiral or “L” ducting with Super Vac adapters. The textured, chip resistant powder coating is baked on for a finish that is as tough as the rest of the fan. All Super Vac ejectors feature third party verified shroud airflow tested to AMCA (Air Movement and Control Association) Standard 210-99. For the ultimate in spark resistant construction, units with a hazardous location motor and optional aluminum housing are classified Type A (highest degree of spark resistance) by AMCA 99-0401.

**12” MODEL P124 ELECTRIC**

The P124 is designed for high powered air movement in a compact sized fan. Turning at 3450 rpm, the fan is small but mighty. Perfect for the department that wants to eject smoke and have a small unit for confined space ventilation.

**16” MODEL P164 ELECTRIC**

The P164 is the most popular unit in the fire/rescue service. It is the perfect combination of high airflow and easy to handle size. Perfect for the department that wants a great, all-around fan.

**20” MODEL P200 ELECTRIC**

The P200 is capable of bigger ventilation tasks and higher airflows. Its 1 horsepower motor is the largest available that will run off the standard 15 amp household circuit. Perfect for the department that has a mix of residential and commercial buildings in their jurisdiction.

**24” MODEL P244 ELECTRIC**

The P244 is the largest smoke ejector available. This fan will quickly ventilate larger buildings and residences. Perfect for the department that has a mix of residential and mid-sized commercial buildings in their response area.

**16” HIGH SPEED HF164**

Combined with the tilt frame, the HF164 becomes the most versatile ventilation system in the industry. The HF164 is the most powerful 16” fan in the industry. It can easily be used for both negative and positive pressure ventilation. Running at 3500 rpm, it has the power to force or pull air deep into a structure or underground vault. Perfect for the department that wants a powerful fan for negative, positive pressure, or large confined space ventilation. Note: Requires a 20 amp circuit to start and run.

**20” HIGH SPEED HF200**

Combined with the tilt frame, the HF200 becomes the most versatile ventilation system in the industry.

---

**ELECTRIC SMOKE VENTILATORS**

**All prices shown are MAP. Our Super Vac prices are below the MAP price, call for pricing**

---

**For Orders and Questions:** Phone **800-759-FIRE** or Fax **914-592-3892**
GAS POSITIVE PRESSURE VENTILATORS

Super Vac is the leader in airflow and compact fan design for gasoline powered PPV’s. The heart of all these units is the cast aluminum 7 blade airfoil propeller designed specifically for use on PPV fans. Poured in Super Vac’s foundry of the toughest aircraft alloys, the blade is the perfect combination of a low noise, high output design. The power comes from your choice of Honda (-H) or Briggs (-B) engines. These engines come with a factory approved two year warranty. The rest of the fan is covered by Super Vac’s five year warranty. The direct drive system eliminates belts and pulleys for years of trouble free operation. Super Vac PPV’s all feature a cart style design with rear mounted pneumatic tires and a flip-up or pull-up full height, full width handle for easy maneuverability. They feature the exclusive Super Vac lever action tilt, with positions of 20º, 10º, 0º and -10º and a locking step brake to make setup lightning fast. The textured chip resistant powder coating is baked on for a finish that is as tough as the rest of the fan. All Super Vac PPV’s feature third party verified air flow tested to AMCA 240-96 and can easily be used with other Super Vac fans in the “V” attack configuration.

18” MODEL 718G4

The 718 is designed to compact dimensions that fit the tightest pumper compartments. They feature the highest horsepower in their class for maximum airflow. Perfect for the department buying their first PPV or outfitting their entire fleet of engines.

20” MODEL 720G4

The 720 is the perfect combination of small size and high power. They also feature the highest horsepower in their class and the exclusive roll cage frame design. Perfect for the department with a mixture of residential and small commercial structures in their district.

24” MODEL 724G4

The 724 features larger engines and higher airflow than other fans. These units are serious work horses to make quick work of ventilating larger occupancies. Perfect for the department with a mixture of residential and mid-sized commercial structures in their district.

30” MODEL 730G4

Super Vac’s 730 is the largest and most powerful, portable PPV available. It is capable of ventilating warehouses, high-rise buildings, and large retail outlets. Perfect for the department with larger commercial and public structures in their response area.

Translucent "L" Duct
The "L" duct is an extremely useful duct that is held open by air pressure from the fan. It folds up to take very little space when not in use. Once deployed, men and equipment can pass by easily in cramped spaces by simply collapsing the duct. (Figure 1) shown attached to an adapter that clips easily onto a fan. Light is able to pass thru the reinforced translucent vinyl. (Figure 2) shown strapped inside the duct allows the vertical leg to be shortened to form a 90 degree bend.

Tilt Frame For 12” and 16” Ventilators
The bracket easily retrofits onto your existing 12” & 16” Super Vac to allow tilting in any direction. From straight up for blowing into an attic access hole, to straight down for blowing into a man hole... this bracket allows you to quickly set up your fans. Can be ordered with new fans or as a kit to easily retrofit to existing fans.

PARTNER® K-12 FD Rescue Saw Package

K12FDPKG $1875.95

The "Package" Model is equipped with the following:
- NIGHT EYE - A bright LED light that provides illumination on a smokey roof or while cutting a roof at night.
- CARRY SLING - A heavy duty, adjustable shoulder carry strap with reflective stripe.
- CARBIDE TIP BLADE - Your choice of a 24-tip (12-inch) or 30-tip (14-inch) wood cutting carbide tip blade.
- FLASHING LIGHT - A red LED flasher mounted to the top of the saw to help locate on a smokey roof.

PARTNER® FD-770

K-770-14”x30T $1280.95
K-770-12”x24T $1187.95

The PARTNER® K-770 is the replacement for the K-760. It is offered with a 14” guard and a 12” guard. The K770 12” is ideal for forcible entry.

It is also great for roof cutting due to its unique power source and the use of CHOPPER blades. This saw consists of five horsepower and weighs less than 20-pounds. This light weight saw is a perfect choice for any Fire Department operation.

Super Vac Rescue Saws

Super Vac Power Pro Cutoff Saw

SVC4 $2057.00 MAP*

The SVC4 is an update to the popular SVC3. Smaller and lighter, the design improves mobility and the 2 stroke engine turns the same 14” diamond blade cutting wheel at 500 more RPM. These high performance saws are designed for the fire and rescue service and proves to cut through concrete, asphalt, stone, and more with ease.

The SVC4 is designed from the ground up with many special features customized for the fire/rescue service including a D-ring pull handle (large enough for thick rescue gloves), the ultimate debris removal system and filters a flow of exhaust against dust direction for cleaner/safer operations.

Super Vac Rescue Saws

SV3-16 16” $2703.00 MAP*
SV3-20 20” $2745.50 MAP*

- Shindaiwa 757 rugged power head
- Output / Speed - 15.6 Hp / 13,000 rpm
- Self cleaning Carbide Chisel Chain, 404 Dual Raker
- Depth Gauge - Full Safety Cover, quick adjust/removal
- Air Filter - 128 square inches / covered and protected
- Sprocket Nose - High Alloy, 8 rivet nose

The Super Vac Rescue Saws: Combining rugged construction, smooth performance and raw power, the lightweight Super V3 Power Pro is the perfect solution for your rescue saw needs. Designed for maximum versatility, (roof operations, to rapid intervention teams, to clearing fallen trees and cutting shoring) the Super V3 will have your department ready for the next call. Comes complete with a full safety cover/depth gauge, a carbide chisel chain, skrench tool and a powerful Shindaiwa 757 engine. The Super V3 is always ready to roll!

7113 Universal Spanner Wrench (A-2019) Fits 3/4” to 3” rocker or pin lug. $14.00
Firehooks Pro Bar, 30”
PB-30 30” $225.95
Forcible entry (halligan type) tool made from dropped forged aircraft steel. Preferred bar of the FDNY. All pro bars are nickel plated.

Firehooks Wide-Adz Pro Bar
WA-PRO-30 30” $237.95
A new type of Pro-Bar Halligan Tool... One-piece dropped forged with an added feature. An additional 1" to the 2" Adz for a total of 3” in width! This modification makes inward forcible entry a breeze. Great for overhauling debris with the wide Adz. Increases the strike surface.

Firehooks Dynamic Trio
DT-3 $300.95
Includes: 8 lb Force Axe, Pro-Bar 30" & Marrying Strap

Firehooks Eight Maul
8-M28-B $75.95
A Sledge hammer with a 28" fiberglass handle for forcible entry. Protected handle for overstrike and self extinguishing celtex grips. The 28" long handle allows this tool to fit any truckman’s belt.

Firehooks Talon Hook
TAL-6 $137.95
A special lightweight all steel 6’ hook with Claw Fork and NY Roof Hook” style head. Celtex non-slip grip. Available in other sizes, call for pricing.

Firehooks Master Tool Bracket/Holding Bracket
HB-1 $50.95
Made especially for Fire Hooks tools. Sold as single bracket.
*Shown with tool not included
MAXXIMUS Forcible Entry Halligan Bar

The MAXXIMUS is the next generation of forcible entry bars. It is the ultimate Halligan bar and is lighter than the Pro-Bar. The Maxximus has a unique T.P.R. grip for a sturdy handle while using this tool. Other features include a depth gauges on the adz and the fork eliminate guess work.

- One piece drop forged forcible entry tool
- Made of 4140 chrome vanadium steel
- A completely "tuned" Halligan
- 2 3/4 inch wide adz for gapping doors
- Rex lock pulling feature on the fork
- Square legs on the fork for striking in tight spaces
- Thinner fork and adz than any bar on the fire market
- Depth gauge markings on both adz and fork
- Molded T.P.R. grip to lessen slippage
- Standard 30-inch length.
- Nearly 2 lbs lighter than the Pro-Bar Halligan

MX-MOD has all of the same features as MX, but with a 2 inch wide adz
MX-REX has all of the same features as MX, but with a Rex lock pulling feature on both fork and adz

Firehooks 8 LB. Force Axes

**FA-8**  8lb. Flat  Fiberglass  $106.95
**FAP-8**  8lb. Pick  Fiberglass  $112.95

The ultimate tool for forcible entry, perfectly balanced to lay correctly in the hands for that short strike zone on an iron or unlimited padlock breaker. Large, oversized head makes the strike zone more accurate and easy to hit. Cutting edge annealed to keep its edge longer.

A2001  6 lb. Flat  Wood  $51.95
A2002  6 lb. Pick  Wood  $56.95
A2003  6 lb. Flat  Fiberglass  $56.95
A2004  6 lb. Pick  Fiberglass  $61.95

For Orders and Questions: Phone 800-759-FIRE or Fax 914-592-3892
Elevator Keys
EKS-12 $193.95
Equipped with 12 keys attached to a 5" ring. Manufactured to conform with the majority of elevator manufacturer access keys. Keys are hard anodized in gold plate to resist rust.

Rex Tool
REXT $162.95
A lock pulling tool, shaped like a "U" with sharp tapered blades that bite into lock cylinders of all shapes and sizes. Extra leverage and original head design provide the mechanical advantage to pull well secured lock cylinders. Opposite chisel end is used to drive rim locks after cylinders are removed.

Officer's Tool Kit
OTK-16 $75.95
Made of high strength steel with the head welded to the shaft. The shaft is covered with a non-slip gripping surface. The shaft end of the tool is formed into a pry bar capable of slipping into tight spaces. The head of the tool has a flat driving surface, with an A-type lock puller machined into the adz of the blade. The complete "thru-the-lock-kit" available with the tool contains the officer's tool, a double ended "key" tool and shove knife.

K-Tool Kit
KTK $137.95
A tool designed (by a FDNY Fire Lieutenant & licensed locksmith) to pull all types of lock cylinders (rim or mortise) from the various glass type or solid doors. The K-Tool Kit consists of K-Tool, Operation Manual, Set of Key Tools, Shove Knife & Leather Pouch.

R-Tool Kit
RTK $181.95
A tool designed to pull all types of lock cylinders too large for the K-Tool unit (above), such as locks that extend out from the door and 1-inch round are easily pulled with the R-Tool. The R-Tool Kit consists of R-Tool, Set of lock tool keys, Carrying bag & Shove knife.
Hydra-Ram

The Hydra-Ram is the first and only one piece integrated hydraulic forcible entry tool. The Hydra-Ram has a maximum thrust opening of 4 inches. There are no hoses or auxiliary pumps to leak or trip on. The Hydra-Ram is truly a one man operation, since the whole unit is in the hands of the user.

The Hydra-Ram weighs only 11 lbs. and is only 13 inches long. Great for the narcotics officer, it can be carried under the coat like a weapon.

No need to worry about maintenance or leaking fluids. The Hydra-Ram uses aircraft seals of triplex quality. The hydraulic fluid is non-flammable, non-toxic and non-freezing. The jaws are made of special stainless steel of 220,000 tensile strength. 10,000 lbs. of force is acquired at 138 lbs. pressure at the handle. While other units may take 30 to 40 strokes on the pump to gain full extension, the Hydra-Ram does it in 8 strokes. The Hydra-Ram can be used in any position, even upside down without any effect on its operation.

The Hydra-Ram II is the same as the Hydra-Ram except it has a maximum thrust opening of 6 inches, weighs 13 lbs. and is 15 inches long. The Hydra-Ram units includes a mallet and heavy duty Cordura bag.

Akron SceneStar™ LED Scene Light

ELSS-SLDC - 14,000 Lumens
ELSS-XLDC - 19,000 Lumens
ELSS-XLAC - 20,000 Lumens (120VAC or 240VAC)

The new LED High Power Scene Light has been engineered to provide industry leading levels of light output with consistency and reliability. SceneStar LED scene lights will continue to provide overall illumination even at elevated operating temperatures through optimized thermal management. Solid-state electronics ensure a lifetime of peak performance.

- Available in AC and DC versions
- Outstanding light output and overall illumination
- Optimized thermal management reduces LED temperatures for long life and reliability
- Streamlined aesthetics in a compact design
- Low ultraviolet light reduces insects during nighttime operation
- Standard powder coat paint in white
- Heavy-duty 6 year warranty
- Serviceable construction

Akron Revel Scout™ Tactical Scene Light

This tactical LED scene light is designed to increase the safety of both firefighters and emergency responders. With versatile mounting options – set, hang, strap, spike – and a removable, rechargeable battery, the Revel Scout revolutionizes the operational ease of fire scene lighting.

The Revel Scout combines a spot and flood light pattern of 14,000 lumens in a 12 lb. package, and the LED tactical scene light can be used to evenly light both entire exterior and scenes and interior spaces. Compact, lightweight and portable, the Revel Scout’s flexibility will provide you with more options than most LED scene lights to help you accomplish various tasks.

Powered by a 28V removable, rechargeable battery, the Revel Scout is all you need to light both your exterior scene and interior work area. Easy to move or position, the Revel Scout’s combination of flood and spot light optics increases your overall scene visibility when lighting exterior areas such as vehicles, structures, parking lots and overhead hazards. Continue work inside for overhaul and other tasks.

- Optional truck mounting bracket, storage case, and battery charger accessories
- Integrated strap included to secure to horizontal object, ladder rung, etc.
- On/off toggle switch to turn light on and off and adjust to 4 light levels
- Corrosion-free construction
- Zero deployment time
- Battery type: 28V LI-ION, Weight: 3 lbs (1.4 kg). Charge time: 1 hour
- Warranty: Light assembly: 6 Year, Battery and charger: 1 Year

**REVEL SCOUT STANDARD PACKAGE** - comes with one battery and a charger

Akron Revel™ LED Scene Light Head (28000 Lumen / DC)

Turn any dark, hazardous situation into daylight with the Revel, Akron’s high powered LED scene light. Bursting with 28,000 lumens, the Revel is all you need to light your entire scene. The patent-pending combination of spot and flood performance increases your overall scene visibility when lighting your exterior spaces such as vehicles, structures, parking lots and overhead hazards. Available as a true surface mount, the Revel can be easily installed in any location on your truck. Other vehicle mounted configurations include: brow, swivel base, pedestal, push-up, pull-up, air operated, and manual mast. The unique, push button swivel makes adjusting and redirecting your light simple with a gloved hand.

- 32 LEDs dedicated to lighting objects at a distance
- 12 High-powered LEDs to distribute light across the entire scene
- Hard-coated polycarbonate lens
- Screws for easy surface mounting
- Rubber mounting pad to isolate light from vehicle
- Lightweight cast aluminum housing
- Multiple mounting points for various applications
- Unique cooling fins for optimal thermal management
- Low ultraviolet light - attracts less insects during nighttime operation
- Standard color is white
- 6 year warranty
- Available as 14000 Lumen/DC - 16 LED's/6 High-powered LED's

Streamlight® Super Bright LED Portable Scene Light II

Turn to a higher power with the Portable Scene Light II. This waterproof area light requires zero deployment time and features a 360° rotating head so you can aim the light where you need it. Need more light for a job? Stack multiple lights for a “light tower” configuration. Cordless and compact, this scene light eliminates tripping hazards common with corded lighting options. Plus, portability from job to job is a snap.

- Produces a high lumen flood pattern
- Five intensity levels correspond to desired run time:
  - 100%: 10,000 lumens; runs 2 hours
  - 80%: 8,300 lumens; runs 2.75 hours
  - 60%: 6,300 lumens; runs 3.75 hours
  - 40%: 4,500 lumens; runs 5.75 hours
  - 20%: 2,300 lumens; runs 11 hours
- Digital display shows intensity level and run time
- Hooked feet for hanging over doors, guard rails, fences, etc.
- Easy to use toggle switch – choose from 5 intensity levels
- Multi-level illumination for scene lighting; head swivels 360° to aim the beam where you need it
- Lithium ion batteries charge in 6 hours
- Batteries will continue charge while operating directly from an AC or DC power source so you can be confident that you will always have a light when you need it
- Indefinite run time on AC or DC external power with the supplied power cords
- IPX7 rated; waterproof to 1m for 30 minutes
- High-impact, thermoplastic housing mounted in a virtually indestructible alloy steel frame
- Includes AC/DC charge cords
- Compact size (16x11x12 in; 40.6x28.9x30.5 cm)
- Lightweight: 15.38 lbs. (6.1 kg)
- Limited lifetime warranty

$547.95

Streamlight® Portable Scene Light

We’ve made the Portable Scene Light even brighter – it now produces 5,300 lumens!

Rapidly deployed and easily stowed, the Scene Light features a narrow footprint and 72” extension pole, letting you bring this light almost anywhere - from wide open places to tight, confined spaces. The Scene Light is an industrial-duty, rechargeable, completely portable high lumen flood light. It uses six (6) LEDs and wide pattern reflectors to produce a uniform flood pattern with two (2) selectable beam widths and three (3) light output intensities. The Scene Light’s telescoping pole and rotating head extend to an overall height of 72 in. It also features stabilizing legs that fully deploy, and lock, in less than 30 seconds.

- Six C4® LED and wide reflectors produce a uniform flood pattern
- Three user-selectable outputs:
  - High for a super-bright flood beam: 5,300 lumens; 410m beam; runs 4 hours
  - Medium for an intense beam and longer run time: 2,500 lumens; 292m beam; runs 9 hours
  - Low for when a less intense beam is ideal and for longer run time: 1,300 lumens; 215m beam; runs 18 hours
- Optimum peripheral illumination for scene lighting; 90° swivel neck allows you to aim the beam where you need it
- Sealed lead acid batteries, rechargeable up to 500 times
- Batteries will continue charge while operating directly from an AC or DC power source so you can be confident that you will always have a light when you need it
- Indefinite run time on AC or DC external power with the supplied power cords
- Integral D-rings allow attachment of the included shoulder strap
- Design allows for the light to be used in confined spaces and rugged terrain
- Cord built into the pole to avoid snags
- Stabilization legs provide balance on uneven surfaces
- Lead acid batteries provide ballast and stability
- 25 lbs (11.3 kg) provides weight stabilization, but is light enough to carry
- Packs to a compact size (22”; 55.88cm) for easy stowage
- High-impact thermoplastic housing; weatherproof construction
- IP67 rated; dust-tight and waterproof to 1 meter for 30 minutes.
- Designed to resist 40mph wind continuous in all directions with head fully extended
- Available in Safety Yellow with AC and DC charge cords and shoulder strap
- Assembled in USA
- Limited lifetime warranty

$679.95

For Orders and Questions: Phone 800-759-FIRE or Fax 914-992-3882
**Dikes - Socks**

Dikes-Socks are ideal for containing and absorbing hazardous liquids. Their moldable shape easily conforms to fit around equipment, drums, tanks and walkways.

SENSIT® P100 - PERSONAL GAS MONITOR
The SENSIT® P100 has high and low alarm levels through audio, visual and vibratory warnings. TWA and STEL alarms are also included, as well as alarm-event data logging. Durable rubber-coated housing withstands incredible abuse and is nearly waterproof.

Key Benefits
- Easy to Use - One button operation
- Serviceable Sensors
- Manufactured and Serviced in Indiana
- Operates 2 Years Before Service is Required
- Easy Calibration
- Limited 2 Year Warranty (including sensors)

Gas | Item # | Price
--- | --- | ---
CO | 912-00000-03 | $231.00

Sensit® Gold Series
Leak detection and gas monitoring combined in a single package. These instruments can be custom configured to meet your needs when detecting combustible gases in the LEL range, locating combustible gas leaks in the PPM range, measuring oxygen content, carbon monoxide and/or hydrogen sulfide. All instruments are equipped with an internal pump for constant sampling. Audible and visual alarms warn the operator of hazardous conditions.

Key Benefits
- Fast leak detection
- Simple calibration
- Lowest overall cost of operation
- Simultaneously view all gas concentrations
- Download operational and calibration data

Gas | Item # | Price
--- | --- | ---
LEL, CO, O2, H2S | 909-00000-H | $2277.00
LEL, CO, O2, HCN | 909-00000-J | $2277.00

SENSIT® P400 - Personal Gas Monitor
SENSIT® P400 is a multi gas detector and hand-held detector designed personal gas monitor to warn the user of hazardous gases in their working environment. The P400 can be configured with 1 to 5 sensors. Optional, Immediate Detection System (IDS) provides early warning to changes in gas concentrations.

- Audible Alarm - 3 Tone
- Vibration Alarm
- Compliance/Status Indicator
- Easy Field Calibration
- Easy-Access Reusable Dust Filter
- Limited 2-Year Warranty (Inc. sensors)
- Visual Alarm - 360° View
- STEL and TWA Alarms>
- Data Logging
- Easy Clean Dust Pre-Filter
- Alkaline and/or NiMH Battery
- Extended Warranty Available

LEL, O2, CO, H2S, HCN | 923-00000-53 | $1246.00
Calibration Kit | 881-00087 | $1080.00 (without case)

SENSIT®HXG-2D - COMBUSTIBLE GAS LEAK DETECTION
The First Affordable Multi Gas Detector With True Digital Display! The SENSIT® HXG-2d gas detector pinpoints leaks quickly with its true digital display and electronic tick control. This multi-gas detector is ideal for natural, butane and propane gas leaks. The SENSIT® HXG-2d is safe, durable and reliable.

Key Benefits
- Direct PPM readout
- Direct "LEL" percent readout
- Electronic tick rate control to pinpoint leaks

*Many other configurations available - please call or check our website for details*
Al-1100 - Carbon Monoxide Monitor with LED & Audible Alarms
$325.95 (Add $140.00 for extended 10 Year Warranty AI-1100EX)
The Al-1100 monitor was designed with EMS use in mind. It is built on the very stable AGS™ solid state platform that doesn’t require routine bump testing or calibration and notifies you if something is wrong. It’s low overall cost of ownership, very low cost to maintain, five year warranty, and rugged durability makes this monitor the best option for passive screening use. NEVER MISS CO POISONING AGAIN and be protected from inadvertent exposures. FINALLY, AFFORDABLE AND EFFECTIVE PROTECTION, for you and your patients!

- Visual and Audible alarms at 30, 60 and 120ppm CO.
- Best suited for EMS run bags or any environment where notification is needed but an exact concentration reading is not required
- No bump testing or calibration required
- Motion switch mode for extended battery life
- 5 year warranty - Including the sensor. *Upcharge for 10 year warranty
- Not a throwaway! Can be refurbished at the end of warranty or continue to be used with a more frequent verification testing schedule.

Al-1200 - Carbon Monoxide Monitor with Snif, LCD Readout, LED & Audible Alarms
$409.95 (Add $140.00 for extended 10 Year Warranty AI-1200EX)
The Al-1200 CO monitor will accurately measure and display CO levels from 12 ppm to 250 ppm. AGS and Snif™ technology provides an update every 4 seconds when in alarm to help you find the source, see the trend and otherwise manage the CO event. There is no routine bump testing or calibration required and the monitor is warranted for five years, including the sensor and its calibration.

- LCD with concentration readout - Visual and Audible alarms at 30, 60 and 120ppm CO
- No bump testing or calibration required
- Motion switch mode for extended battery life
- 5 year warranty - Including the sensor. *Upcharge for 10 year warranty
- Not a throwaway! Can be refurbished at the end of warranty or continue to be used with a more frequent verification testing schedule

Al-1201 - Carbon Monoxide & Methane Monitor w/ Snif, LCD Readout, LED & Audible Alarms
$493.95 (Add $140.00 for extended 10 Year Warranty AI-1201EX)
Built on the same technology and with all the features of the 1200 monitor and now incorporates the energy efficiency, motion switch technology, enhanced alarm and backlit LCD screen built into all of our V2 models. In addition to all that, it adds LEL (flammable gas) capability that is calibrated to methane. You can count on the Airspace monitor to give you an accurate reading for methane gases you might otherwise not know are there. Like other LEL sensors, it will also “see” most of the other hydrocarbon gases – such as gasoline, propane, natural gas, hydrogen, acetylene, etc. It won’t give an accurate ppm reading for those other gases because the calibration is to methane, but it will be very useful since any ppm reading for those other gases will be an indication of an ambient air saturation – therefore a flame or explosive hazard – is occurring.

- LCD with concentration readout - Visual and Audible alarms at 30, 60 and 120ppm CO and 5000ppm LEL (calibrated to methane)
- No bump testing or calibration required
- Motion switch mode for extended battery life
- 5 year warranty - Including the sensor. *Upcharge for 10 year warranty
- Not a throwaway! Can be refurbished at the end of warranty or continue to be used with a more frequent verification testing schedule

Al-1400 - HCN Monitor
$465.95
Includes AGS™ Technology with Snif™ and a backlit LCD display, the 1400 HCN monitor will accurately measure and display HCN levels up to 30ppm. It also includes alarms with a panel of flashing lights and 92 decibel audio that begins at 5 ppm. The Snif™ technology provides an update every 4 seconds when in alarm to help you find the source, see the trend and otherwise manage the event. Like all of our monitors, there is no routine bump testing or calibration required and the monitor is warranted for three years, even the sensor and its calibration is included in the warranty.

- LCD with concentration readout - Visual and Audible alarms at 5 and 10ppm HCN
- No bump testing or calibration required
- 3 year warranty - Including the sensor.
- Not a throwaway! Can be refurbished at the end of warranty or continue to be used with a more frequent verification testing schedule
VT100 VesTank™ Portable Fire Pump
$382.00
• Easy to put on
• 8 gallons capacity, up to 60% more than backpacks
• Made of strong/durable urethane coated Nylon, which makes the VesTank™ lighter and more flexible
• Water inside the vest helps keep the body cool
• Quick-connect pump-to-tank attachment
• Unique pump features impact plastic over brass design
• Tool-free assembly/disassembly
• High volume pump directs stream of water more than 35 ft.
• Comes standard with adjustable spray and fixed stream nozzles.

M100 Ranger Deluxe Rigid-Pak Brush Pump w/ Pistol Grip
$162.95
• “Thick walled” polyethylene plastic tank will handle rough and harsh environments
• “Non-slosh” rounded design keeps the unit balanced and steady
• Full padded pillow comforts that impinging feel of other tanks
• Completely corrosion resistant; will not rust like galvanized steel models
• Adjustable padded shoulder straps are rugged, yet fit comfortably & distribute the weight evenly
• 5 gallon capacity

DBD500 Smith Indian Chief Dual Bag Tank
$191.95
A premium backpack fire pump with an inner bag liner with protective nylon fabric outer bag offers more protection and comfort. It can be easily collapsed and stowed when empty. All the seams are reinforced at all stress points. The brass hand pump is complete with combination nozzle and designed with positive shut-off.
• 5 gallon collapsible bag rolls up to fit in small storage space.
• Inner bag liner with protective nylon fabric outer bag offers more protection and comfort. Comes with an extra liner stored in utility pouch.
• Premium padded shoulder straps include clip-on strap to secure pump and leave hands free. Also has center cinch strap to help balance load.
• Quick disconnect for hose snaps into 3” fill cap.
• Fedco pump made from 2 seamless brass cylinders, with guide bushing on inner cylinder to ensure bind free operation.
• Fedco pump is approved for use by the US Forest Service.
• Combination nozzle allows for operator to change from a straight stream to a cone spray quickly and easily without any special tools.
• Nozzle secures to pump with beaded chain
• MADE in the USA

FSV500 Smith Indian Smokechaser, Vinyl Tank
$162.95
An economical backpack fire pump made of strong polyester fabric encased in vinyl for durability. It can be easily collapsed and stowed when empty. All the seams are reinforced at all stress points. The brass hand pump is complete with combination nozzle and designed with positive shut-off. • 5 gallon vinyl collapsible bag rolls up to fit in a small storage space.
• Heavy duty vinyl encased poly bag is both durable and comfortable.
• Large fill cap with watertight gasket and tether that secures to bag.
• Large 4” filler opening for easy filling.
• Premium padded shoulder straps include clip-on strap to secure pump and leave hands free. Also has center cinch strap to help balance load.
• Fedco pump made from 2 seamless brass cylinders, w/ guide bushing on inner, ensure bind free operation
• Fedco pump is approved for use by the US Forest Service.
• Combination nozzle allows operator to change from straight stream to cone spray quickly & easily
• Nozzle secures to pump with beaded chain
• MADE in the USA

FSV500PG Smith Indian Smokechaser, Vinyl Tank w/ Fedco Pistol Grip Pump
$169.95
Same as FSV500
• Built with a PISTOL GRIP HANDLE for easier pumping and improved ergonomics. Solid brass base, with a comfortable rubber grip.
MCLF  McCloud Tool
Complete with fiberglass handle and heavy duty hoe blade to withstand the rigors of Wildland firefighting. Can be used for trenching, grubbing or slashing brush. Also useful in cutting through deep duff, underbrush, and similar fuels.  
$62.95

FF  Flamefighter Fire Flapper
$51.95

BRF-5  Brush Rake 5' Fiberglass Handle
$43.95

PUL-5  Pulaski Axe
A combo axe and grub hole ideal for chopping, digging fire lines in hard and soft soils. Ground and tempered cutting edges.  
$56.95

1304  Perfex Fire Broom
A broom especially adapted for fighting fires. Constructed of Rattan with a metal case and a heavy ash handle.  
$17.95

LSS27D  27" Large Scoop Aluminum Shovel, w/ D Handle
$59.95
RBL20 True North L2 RIT Bag - Red
$255.32

NEW AND IMPROVED Made with our exclusive Iron-Cloth™ the L-2 sets a new standard for rescue bags. Our ultra tough Iron-Cloth™ combined with the Heat-Shield™ Nylon 6.6 skid plate makes the L-2 the toughest bag on the market, top-to-bottom. The skid plate allows the bag to glide over the roughest surfaces and makes it extremely wear resistant during training evolutions. Innovative access-hatch design makes access to spare face piece and valve set quick and easy. It also features a 60" shoulder strap, which can be re-positioned for carrying, dragging, or lowering the air bottle. Pull the side zipper and the bag expands to allow the addition of a rope bag or secure the bag to the webbing on the outside.

- Designed to hold all makes of masks and bottles
- Quick-Draw transfill hose pocket pulls hose end out and ready to grab
- Flashlight holder on top makes bag easier to find in low visibility conditions
- Two tool pockets provide fast access to small hand tools, light sticks

New Features:
- More 3M Reflective Tape for a 360 degree view
- Additional webbing to attach L2 rope bag to the outside of the L2 RIT bag
- Increased number of rivets to skid plate for maximum durability
- Included strap on the inside to better secure the cylinder in the bag

RIT-150 Avon Combo Rope n Tool Bag
$160.95

Developed to be used by FAST/RIT teams. The side pouch provides an area to store rope for easy deployment. The interior of the bag provides space for smaller tag line bags, lights, or other equipment used for Rapid Intervention and Firefighter Rescue.

RIT1080 Avon RIT Team Staging Area Mat
$167.95

RIT MAT 5’ x 10’ Features all blue rip stop vinyl. Sections are all marked with the word “RESCUE.” There is a pleated area for spare air cylinders. Plenty of room for all your rescue equipment. This is a great tool for all RIT RIC and FAS teams.

For Orders and Questions: Phone 800-759-FIRE or Fax 914-592-3892
JSA-300 Lightweight Basket Type Stretcher
Nylon web straps at chest, abdomen, thigh, and calf. Adjustable footrests for vertical lifting. Frame is 5/8” steel tubing; cross braces and runners 3/16” x 3/4” flat steel. Basket is 18 gauge, 1” hexagon mesh netting.

DIMENSIONS: 80-1/2” L; 8” H
$270.95 (extra motor freight charges apply)

JSA-300W Same as the JSA-300 without leg dividers or footrests.
$270.95 (extra motor freight charges apply)

JSA-300CS Confined Space Splint Rescue Stretcher
The new 19” width Stretcher has been designed for rescues where space is confined. With steel, all-welded rigid construction, which does not rely on the injured person to attain form or rigidity. Light in weight and ample in size. The basket is 18 gauge, 1” hexagon mesh netting. Nylon web straps for securing at chest, abdomen, thigh and calf. Supplemental accessories to facilitate special handling needs are available.

DIMENSIONS:
81 1/2” L; 18 3/8” W; 7 3/4” H
$315.95 (extra motor freight charges apply)

JSA-300-B Break Away Stretcher
Designed to rescue injured persons from locations where lengthy foot travel is mandatory. The stretcher breaks into two halves which can be back-packed to the point of rescue and assembled in seconds. It can be secured to a standard back-pack for carrying. Three positive lock clamps secure two halves together. Four 60” web straps are standard. Stores in space 44” x 12” x 24”.

$598.95 (ships via UPS)

JSA-200 Plastic Stretcher
Yellow high-density polyethylene shell, supported by a stainless steel outer rail, permanently attached with stainless steel semi-tubular rivets. Features molded runners, fully exposed outer rail, non-absorbent foam pad secured to stretcher and four patient restraint straps. Ideal for unusually rugged rescue situations such as industrial, mining or construction. Patent Pending.

$632.95 (extra motor freight charges apply)

JSA-200B Break-Away Plastic Stretcher
The same construction as JSA-200. Designed to rescue injured persons from locations where lengthy foot travel is required. The stretcher breaks into two halves which can be back-packed to the point of rescue and assembled in seconds. Positive-locking quick-release pins secure two halves together. Four straps are standard.

DIMENSIONS: 84 1/2” L; 24” W; 7 1/2”
$826.95 (ships via UPS)
Turtle Plastics - DURA CRIB - AUTO X CRIB TOOL KITS

Proudly made in the USA from 100% recycled plastic.

Unlike traditional wood cribbing, Turtle Plastics Dura Cribbing is stronger and more effective. The strong plastic is stable and will not absorb oils or other hazardous fluids on the scene. Each cribbing piece includes a rope handle or molded hand grip for easy carry and deployment. The Dura Crib® Kits includes Cribbing, Wedges, Lock Blocks and Chocks, all packed into one complete kit.

- Non-Absorbing • Super Stability • Corrosion proof • Non-splitting
- Stronger, cleaner, and safer than wood

Available in many kit styles shown below - See our website for more options/info

Sava High Pressure Flat Form Lifting Bags

High-pressure lifting bags are used for lifting the heaviest loads. High-pressure lifting bags exert maximum force in a concentrated area, making them ideal when lifting rigid structures in tight places. Their unique structure also allows use in load shifting, heavy truck or aircraft recovery, and different moving situations.

**Flat Bag design ADVANTAGES:**
- A larger usable area with maximum lifting capacity than conventional bags
- Stability!
- Three (3) bags can be used at the same time, while with conventional you can only use 2 at a time.
- Side profile – during manipulation, protect the inner part of the lifting bag.
- Competition doesn't have FLAT bag design
- Patented diagonal design of reinforced material (minimal safety factor 4x).
- EN 13731 certified (NFPA coming up expected in 2019-2020)
- Certified also ISO 9001/2000
- The connection is compatible with Hurst & Holmatro products.
- Savatech bags only 1-inch thickness with cone-shaped protection edges. Meaning: Insertion height is <1 inch.
- Resist temperature ranging from -20 to 80 deg. C
- Reflective markings on edges.
- Unique antislip surface: Molded positive gripping interlocking convex rubber dimples w/diameter not less than 3/8".
- "In house" rubber compound (NR-BR type of rubber used for high-pressure lifting bags).
- Great grip. Excellent wear resistance.

Sava High Pressure Flat Form Lifting Bag Kit 10 Bar-145 PSI
Model: SAVA SFB-H 12/17 (3-BAG-KIT) $7345.00

Kit Contents:
(3) 291295 SFB-H 12/17 24" x 24" lifting bags
291261 Inflation hose 6' (Red)
291262 Inflation hose 6' (Blue)
291263 Inflation hose 6' (Grey)
291298 Metal box triple deadman unit 145 psi
72128-CGA-10 bar Tescom single-stage piston regulator, 145 psi output*
Air cylinder to be supplied by the customer
*Includes 6' supply hose (not shown in the above photo)

Sava High Pressure Flat Form Lifting Bag Kit 8 Bar-116 PSI
Model: SAVA SFB-K 10/17 (3-BAG-KIT) $6534.00

Kit Contents:
(3) 519884 SFB-K 10/17 24" x 24" lifting bags
516191 Inflation hose 6' (Red)
516192 Inflation hose 6' (Blue)
529314 Inflation hose 6' (Grey)
544124 Metal box triple deadman unit 116 psi
72128-CGA-8 bar Tescom single-stage piston regulator, 116 psi output*
Air cylinder to be supplied by the customer
*Includes 6' supply hose (not shown in the above photo)
BALL TYPE SHUT-OFF VALVES

- Large ports to minimize pressure drop and turbulence
- Low torque operation
- Speed of operation
- Positive closure
- Flow in either direction
- Straight through flow
- Forged strength up to 600 lbs. pressure rating
- Ease of installation
-Conserves space
- Visual indication of operating condition - open or closed
- Tested hydrostatically in the open and closed position
-Simplicity of maintenance
-Durability
-Reliability
-Listed by Underwriters Laboratories, Inc.
-Approved by Factory Mutual Research Corporation

Furnished: Female NPT inlet and outlet, forged brass body with cadmium plated vinyl insulated handle and chrome plated brass ball with Teflon seats.

ALCO-LITE invented the aluminum ladder. The ALCO-LITE name is synonymous with quality, dependability and service. For these reasons, ALCO-LITE fire ladders are used by all types of departments - paid and volunteer - large and small throughout the U.S. and the world.

All ALCO-LITE ladders meet or exceed the applicable standards established by NFPA for fire department ground ladders. These ladders are designed to be used in accordance with the practices established by both the National Fire Protection Association (NFPA) and the International Fire Safety Training Association (IFSTA). For complete information on these practices, please contact the appropriate organization to obtain their documents relative to fire department ground ladders.
